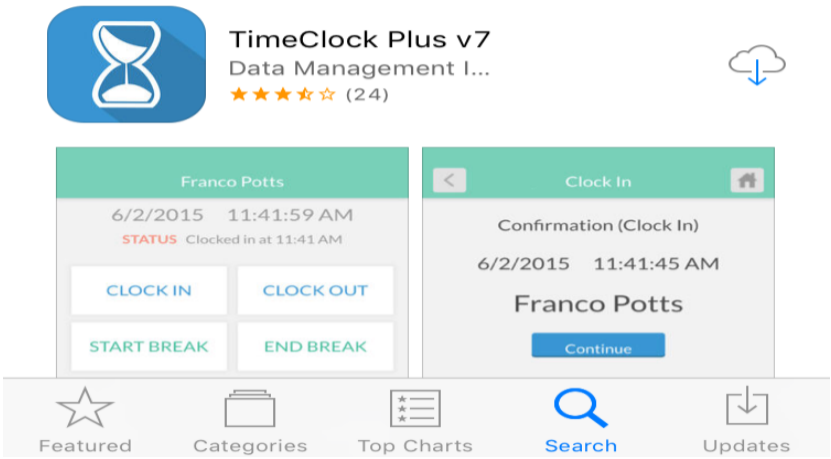
Time Clock Plus
Mobile App Installation Instructions

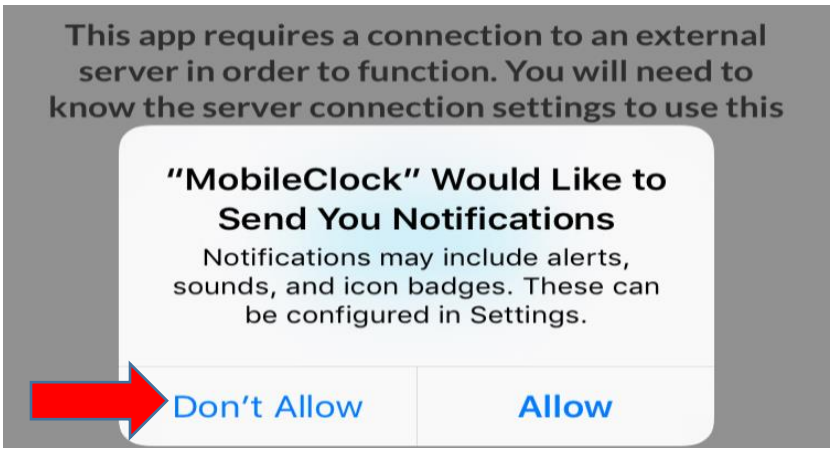
Note: You must have either an iPhone or an Android phone to use the mobile app.
I do not have the steps for an android, but I'm sure you can use the same settings shown in the following screen shots to make it work.

iPhone App Installation

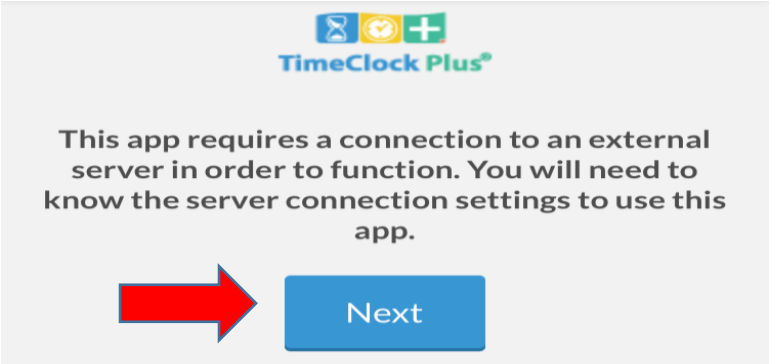
1. Go to the app store and download the Time Clock app (**TimeClock Plus v7**) as shown in this image



2. When the download has completed, you may or may not see the following screen. If the message appears asking about notifications, click on **Don't Allow**.

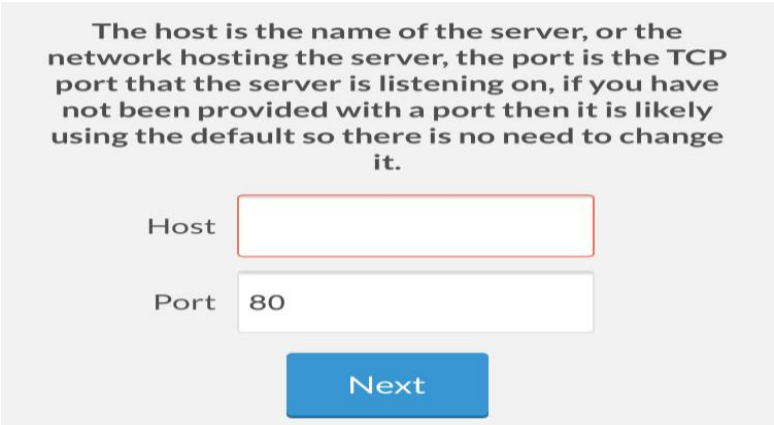


3. Here is the next screen…Click on **Next**

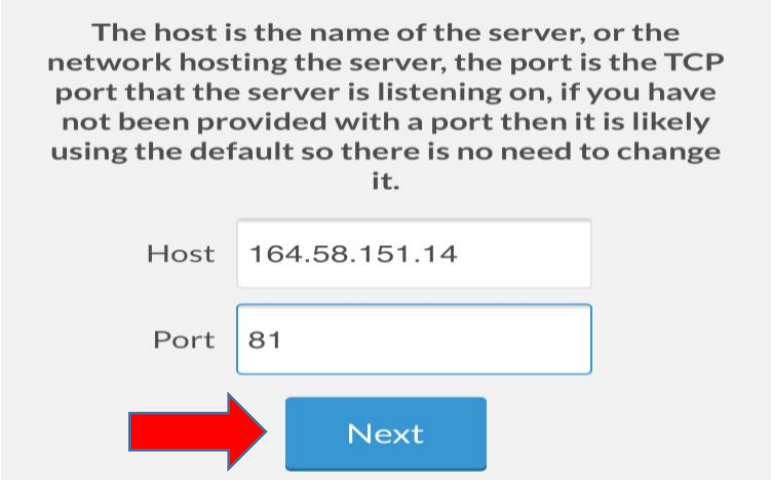


4. Next, you are asked for a Scheme – pick “http”

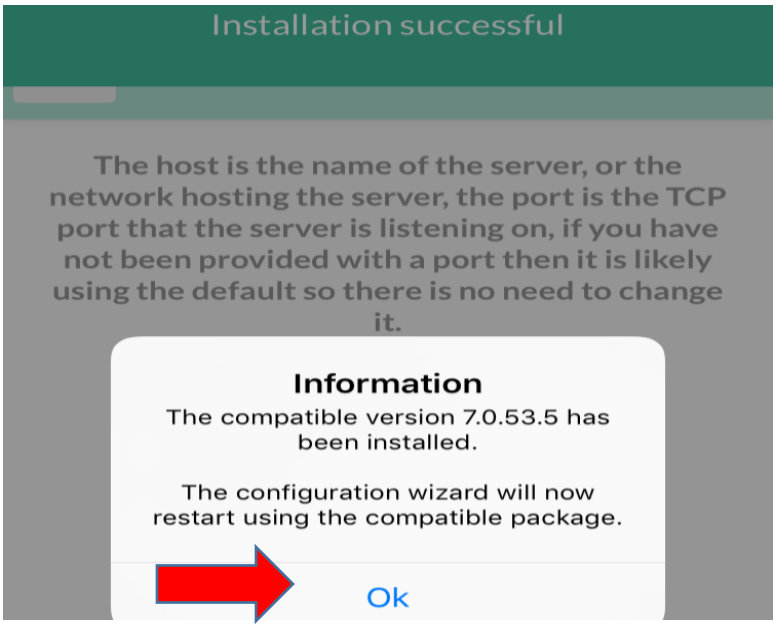
5. The following screen appears…



6. Key in the Host and Port shown below…then click on **Next**



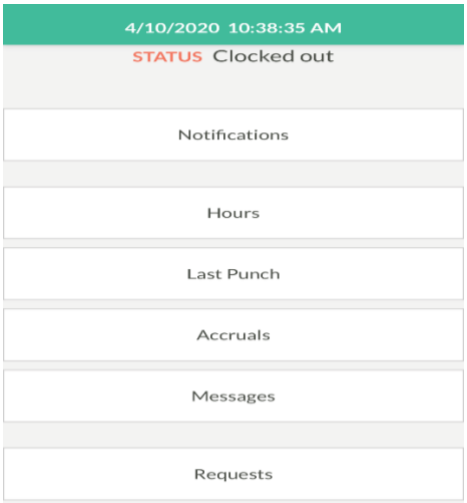
7. When the following screen appears, click **OK.** It may show a different version number as this will keep changing.



8. If asked for a Namespace – leave it blank

9. Next, you will be asked to select a company – select the following: *Moore Norman Technology Center 6682*

10. Enter your Employee ID number – click Log On

11. Enter in your PIN – click Log On


12. You should see this screen next…
