Hearts and Minds

Hello everybody,

We'd like to take this opportunity to introduce our student-created and managed club, Hearts and Minds, before we start off with our projects in the coming year. Our club looks to help students explore the medical field and educate our school community about the various aspects of health and medicine. Our first project is focused on creating a year-long awareness campaign on relevant health-related topics. Keep a lookout for our announcements, posters, and flyers to be informed about the topics and proactive about the issues.

Thank you for supporting us!

Hearts and Minds, Organizer
