TUBERCULOSIS HEALTH QUESTIONNIARE

Our records show you to be skin test positive for tuberculosis (TB). A positive skin test generally means that at sometime during your life you have been infected with the tuberculosis bacteria. It does not mean you have active tuberculosis disease now. If you have a positive skin test for TB, you must provide documentation of a negative chest x-ray.

Folsom Cordova Unified School District Board Policy 4114, states that all FCUSD employees and volunteers who have a positive skin test and a negative chest x-ray shall be required to complete a questionnaire regarding their health as it relates to possible infection of tuberculosis every four (4) years.

Please answer all of the questions on this page and return it to the FCUSD Human Resources 1965 Birkmont Drive, Rancho Cordova, 95742, within 10 days. If all questions responded to are negative, no further follow-up is required. If you have any of the following symptoms of TB, you must obtain clearance and provide written documentation from your health care provider that you are free of active tuberculosis. Have you had any of the following signs and symptoms of tuberculosis?

Productive cough which has lasted at least 3 weeks _____Yes _____No

Weight loss without dieting _____Yes _____No

Persistent fever/chills _____Yes _____No

Night sweats _____Yes _____No

Loss of appetite _____Yes _____ No
