FROM: Phillip Brown
DATE: December 8, 2014
RE: MCS Receives Highest Percentage of Students Receiving Credentials in the State.

Montgomery County School's high school students are ranked first in the state with the highest percentage of students receiving credentials for the courses in their career and technical pathways. These courses are designed to enhance the learning environment for students and provide teachers with the ability to access the students' understanding of specific skills related to the course. Students with credentials have proven to be more marketable in the employment arena and are better prepared to succeed in a post-secondary environment.

Students in Montgomery County have received the following credentials in 2013 – 2014:

- 8 Drafting Credentials
- 132 Career Readiness Certificate – bronze, silver, and gold
- 39 CPR/First Aid
- 843 Fire Fighting Credentials
- 206 Microsoft Office – which includes word and power point and 9 earned Work Expert.
- 21 Nursing Assistant I
- 54 Masonry
- 46 Serve Safe – Food Protection Manager Level Certification

Thus, for the 2013 – 2014 school year, 1350 credentials were received, with a percentage of 54.7% of enrollments in CTE courses receiving a credential.

Phillip Brown, Director of Secondary and CTE Education, states, "We are very proud of each of these students. Those who have earned portable credentials in high school have a head start in developing their careers." Additionally, it is important to recognize that students who earn credentials or become a Career and Technical Education Concentrator graduate at the highest rate of all programs- 95.5%.

Complete report attached.

DRAFT

2013 -2014 Credentialing Data Foreword

For decades now, North Carolina Career and Technical Education (CTE) has added state-wide processes to enhance teaching and learning via the development and implementation of course blueprints, curriculum resources, and end-of-course (EOC) assessments for all CTE courses with an adjoining digital platform for testing and data collection. In addition to educational structures to enhance instruction and curriculum delivery, all local CTE programs have staff members with duties that support instruction of students with exceptionalities, provide career development opportunities, and support state-wide EOC assessments.

Continuing this tradition of excellence, NC CTE has become an innovative national leader in the administration and analysis of industry-recognized credentials for secondary students. Collection of information regarding student-earned industry-recognized credentials began in earnest with data from the 2010-2011 school year (see table below). Since that time, a total of 335,791 industry-recognized credentials has been earned by high school CTE students.

North Carolina Career and Technical Education 2013-2014 Credentialing Data offers a detailed report of the 115,005 credentials earned by CTE students in North Carolina public schools. The 72 different industry-recognized credentials exams students took during the 2013-2014 school year included Adobe Web Communicator, Carolina Certified Plant Professional, Career Readiness Certificate, ServSafe, Microsoft Office Specialist, Nurse Aide, OSHA 10-Hour, and Foam Fire Stream.

Credential data contained in this report is collected at the individual student level. The scope and sequence of this report, which includes raw data in spreadsheets and graphically displayed, is as follows; State-wide Data by Credential, Credential Data by Region, Credential Data by LEA (local education agency), and Regional Credential Data by LEA per Credential.

Hierarchical Benefits of Credentialing

After extensive formal and informal dialogue throughout North Carolina concerning the benefits of credentialing was conducted, a hierarchical list was codified. For several years now, NC Career and Technical Education (CTE) staff has disseminated this listing in an effort to educate stakeholders and promote increased credentialing opportunities for CTE students.

- **Instruct – Assess – Instruct**
  A prime outcome of credentialing assessments for educators is the ability to gauge the level of student understanding regarding specific skills and knowledge within a program of study and adjust instruction as needed to ensure student competence. While all NC CTE courses have state-wide EOC assessments, credentialing scores provide additional data for the instruction/assessment loop and continuous improvement efforts.

- **Career and Continuing Education Preparation**
  Students who have attained a credential have a documented skill set, are more marketable in the employment arena, and are better prepared to succeed in a post-secondary environment. Nationally, CTE has excelled in its competency-based approach to teaching and instructional evaluation. NC CTE credentialing offers students authentic evidence of skill attainment that is relevant to careers and continuing education.

- **Workforce Development Component**
  CTE programs are major contributors to a local education agency's (LEA) school district's reputation as a prime supplier of skilled workers for local communities. Business and industry normally consider external credentialing a reliable "predictor of success" for entry-level employment. Labor pools with specific technical skills along with foundational and transferrable skills attract business to locate and operate within a region.

- **Highly Qualified Teachers**
  In a number of cases NC CTE teachers are required to become certified in order to teach a course that offers credentialing opportunities for students. This is highly recommended in all courses that have credentialing as a component. Earned teacher credentials, with related training, expand teachers' content knowledge in the skill set areas and job roles for which they instruct students.

DRAFT

Criteria for Selecting Credentials

For the NC CTE state staff there was a natural progression from documenting the benefits of credentialing to developing criteria for selecting credentials that would allow all parties to reap the intended benefits. The CTE state staff developed the following criteria that would guide the public school systems in North Carolina when acquiring credentials:

- **Credential assessments should be criterion-referenced tests.** Criterion-referenced test scores reflect the skill or behavior expected of a student having taken a specified course. Norm–referenced tests in comparison identify whether the student performed better or worse than other students, but not to what degree a student can perform a skill or demonstrate a certain behavior.

- **Credentials should be industry driven or at least recognized.** If national standards exist for the career area or specific occupation, the credential should reflect the appropriate scope of the national standards.

- **Credentials should align directly with some or all course objectives.**

- **When used for accountability measures of technical attainment under the Carl D. Perkins Career and Technical Education Act of 2006, at least 80% of course content must be assessed by the credential examination.** Perkins Act is the federal legislation that regulates CTE programs.

- **Credentials should be skill/experience appropriate for grade level.** Even though a credential is a criterion-referenced test, is nationally recognized, and aligns with course content, it must also be appropriate for the age and experience of high school students.
