Creative Writing

Teacher Directions:

To get your students writing creative stories or sentences, I've provided some fun writing templates.

The words on the side of the next 2 writing pages help your students feel confident spelling the words in their writing and also provide inspiration for reluctant writers. You can have them write a story using as many of the words on the side as they can or just a story with those as help. The next page has 3 boxes with individual lines so you can also have students write/illustrate a new sentence for each box using the words on the side.

I have also included a few levels of writing pages and a words chart that you can put in your writing center for students to reference to write fun stories. You can also send the chart home, have students keep it in their folder, or use in small groups for extra reading practice. They'll love getting to color it to make it their own!
