Safe Transportation of Students in Non-School Bus Vehicles

The Newport School District has both the responsibility and liability for the transportation of students and student safety. In addition, District employees are responsible for exercising reasonable care for the safety of students who are in their custody.

As circumstances may occasionally require the transportation of students by school employees in **non-school** bus vehicles, it shall be the expectation that staff so authorized must have the following on file in the District office prior to being authorized to transport students accordingly:

1) Driver's record abstract of the employee
2) A current and valid first aid card of the employee. Exception may be made when there are delays in card processing.
