Field Trip Self-Transport Guidelines

The following guidelines have been reviewed and approved to provide High School Principals parameters in determining if a student may self-transport to a field trip. If the school provides transportation, all participants must travel with the school.

<u>In order for a student to self-transport:</u>

- The destination of the trip must be less than 40 miles, one way, from the school.
- Written parent permission is required for each field trip when a student is providing their own transportation or riding with their parent/guardian.
- **There must be less than 20 students attending the field trip**.
- **If one student is unable to provide his or her transportation, the school must provide transportation**.

***Under no circumstances will students be allowed to carpool when providing their own transportation to a school sponsored field trip.**

In compliance with federal law, UCPS administers all educational programs, employment activities and admissions without discrimination against any person on the basis of gender, race, color, religion, national origin, age or disability.
