Show Gender on Transcripts

Summary

Districts can now choose whether the student's gender should be displayed on transcripts. This is available for canned and custom transcripts based on the following formats: SchoolToolTranscript003, SchoolToolTranscript004, and MiddleSchoolTranscript.

Details

In **Maintenance > Application > Report Format > Transcript/Permanent Record Report**, new and existing canned or custom transcripts based on SchoolToolTranscript003, SchoolToolTranscript004, and/or MiddleSchoolTranscript will see a new prompt to "Show Student Gender". To preserve existing functionality, the prompt will default to "Show Gender" upon upgrade.

If the *Show Student Gender* prompt is set to Hide Gender, the label and value for Gender will not display on the resulting transcript.

If you access the report format and then save, an audit log entry will be added stating that the *Show Student Gender* prompt was set to "Show Gender".
