Background: *Middle school is a critical time for students to explore interests, develop new skills, and begin to find areas where they may have strengths and passions. Our exploratory courses are designed around the developmental need to discover what they are good at, something they enjoy, and something that may influence what they pursue in the future. We hope to highlight those experiences and the opportunities our middle school students have in preparation for their high school years and beyond.*

Discussion/Information Items

Dr. Rikli provided a summary of the October 1, 2026, Board Retreat. Board retreats are publicly noticed meetings open to the public, and no action is taken. Five topics were discussed: high school boundaries; possible expansion of busing to the middle level; district surveys; Board accomplishments; and teacher and administrator salary schedules. Mr. Madler thanked the administration for their preparation and noted that salary schedule decisions must consider elevated health insurance costs. Mr. Lodes thanked the Board and administrative team. Dr. Rikli clarified that there will be no substantive changes to district busing until the transportation RFP is issued next fall, and that the RFP will specifically request a pay-to-ride proposal.

Dr. Villarreal presented a proposal regarding three development areas within the Bell Elementary boundary. The areas include Bellino 72, with approximately 800 apartments across 10 buildings; the area southwest of 66th Street and Cedardale Road, with approximately 235 lots; and over 200 acres of undeveloped land north of Highway 370 and west of 48th Street, zoned residential with no development plans filed. The proposal would assign these areas to Rumsey Station Elementary, La Vista Middle School and Papillion La Vista High School before any homes are sold or leases signed. This change would relieve enrollment pressure at Bell and help address the enrollment gap between the two high schools. No current residents would be affected. Board members expressed appreciation for the proactive approach, noted Rumsey Station's declining enrollment, and noted the change avoids students crossing 72nd Street and Highway 370. Dr. Rikli suggested outreach to realtors, and Dr. Villarreal shared that realtor folders with school information are being developed for active developments.

Mr. Richards reported that a radio committee of principals, assistant principals and Mr. Moore from Technology met at least three times since last spring. Current radios are aging and of mixed brands. The committee recommends a ratio of approximately 25 students to one radio at the elementary level plus special education needs, 20 radios per middle school and 30 radios per high school. The committee recommends Motorola radios, serviced locally by First Wireless. Mr. Moore expressed the proposed purchase is 475 radios for a total of $186,785.25, well below the original estimate, because district-wide communication through the Sarpy County radio system eliminates the need for additional repeaters. Board members discussed a replacement plan based on an expected six- to seven-year life, including building replacement costs into the depreciation fund, and expressed support for a consistent model across buildings.

Communication

No Public testifiers testified.

Board President Lodes reviewed the future board calendar.
Board President Lodes adjourned the meeting at 6:57pm.

AGENDA SUMMARY SHEET **Attachment –1 Page**

Subject: Boundary Change for New Developments for Bell Elementary to Rumsey Station

Meeting Date: October 26, 2026

Prior Meeting Discussion Date: Board Retreat October 1, 2026; October 12, 2026

Department: Business Services

Action Desired: Approval__X____Discussion_____Information Only_____

Background:

The Papillion La Vista Community Schools must periodically change attendance boundaries for school to manage high growth areas, create a more balanced enrollment and provide relief to our high enrollment elementary schools. As discussed at the Board retreat on October 1, there are 3 land areas in the Bell Elementary attendance area, north of Highway 370, that the administration would recommend changing from Bell Elementary to Rumsey Station attendance boundaries.

These areas are identified as:
1) Bellino Land Development LLC (NE of 72nd St. and Cedardale)- 800 apartments in 10 Buildings.
2) Trumble Hills Development (66th and Cedardale)- 235 total lots, about 70 townhome size lots, 165 larger lots.
3) Undeveloped land (North of HWY 370, West of 48th St.)- About 200 acres across 3 parcels owned by MNA1 LLC. No development plans submitted at this time.

The first two developments are in the grading stage and are expected to start building sometime in 2027 or later.

According to our RSP Enrollment Study, Bell Elementary is expected to reach over 500 students in 2029-30 if no changes are made moving forward. Rumsey Station is well under capacity and is expected to be under 250 students in 2029-30 if no changes are made to the boundary.

Recommendation: Motion to approve the change in school boundaries from Bell Elementary to Rumsey Station for the Bellino Land Development at 72nd and Cedardale, the Trumble Hills Development at 66th and Cedardale, and the undeveloped land north of Hwy 370 and west of 48th Street as identified on the attached map and description in the Background information above.

Prior Meeting Discussion Date: October 12, 2026

Action Desired: Approval__X___ Discussion_____ Information Only ____

Background:
As part of the safety and security package of the Bond, the district would recommend replacing all school building radios across the district. Many of our schools have older radios that are not working correctly or have older batteries that need replacing. Also, we have different brands of radios at each building. This will standardize our district radios to Motorola at each building and we will work with one company, First Wireless, to set up frequencies and service them as needed.

Last Spring, the district established a Radio Committee consisting of administrators from the elementary, middle, and high school levels to discuss guidelines for use in each building and how many radios are needed at the different levels. We researched what other districts do as far as the number per building as well. As part of that process, recommendations were made to have 1 radio at the elementaries per 25 students and coverage for Special Education students as identified by the IEP team. The middle school requests 20 radios per building and the high schools would need 30 radios per building. We have received quotes for a total of 475 radios district-wide for $186,785.25.

Recommendation: Motion to approve the replacement of school radios district-wide with Motorola radios at each school for $186,785.25 from First Wireless as presented.
