# Review #1

**Which of these is an advantage of a spool gun when GMA (MIG) welding aluminum?**

**A. Able to handle more voltage and amperage**

**B. Allows faster electrode wire speed**

**C. Less distance to feed the electrode wire**

**D. Allows a liner over 9 m (30')**

# Review #2

**Switching from short-circuit to spray-arc transfer requires which of these adjustments?**

**A. Increasing the voltage and current**

**B. Increasing nozzle-to-workpiece distance**

**C. Switching the drive rolls**

**D. Flipping a switch**
