Maine School of Science and Mathematics
95 High Street
Limestone, Maine 04750

REQUEST FOR PROPOSAL: USDA RUS DLT VENDOR
Prepared September 9, 2021
Bids Will Be Open: September 13, 2021
RFP Due Date: September 27, 2021 at 4:00pm

GENERAL RFP QUESTIONS:

For site specific questions related to equipment, please refer to the "Contact and Site Location", beginning on page 13, to find the contact information for the district's technician lead. Please include the contacts below on all correspondences.

Name	Title	District	Email

Marie Beckum	Director of Finances	MSSM	beckumm@mssm.org
Alejandra Sulpizio	Lead Consultant	Precision NPO Solutions	asulpizio@precisionnpo.net

INTRODUCTION AND BACKGROUND

The Maine School of Science and Mathematics (MSSM) is a tuition-free, public, residential high school that enrolls students from across the state and serves over 500 students each year through its academic and summer offerings. Opened in 1995, the school provides high school students a rigorous, student-centered curriculum that emphasizes the connections between math, science, and humanities, and culminates in opportunities for authentic research. MSSM's summer camps inspire Maine middle school students to explore their passions for science, math, engineering, and technology. MSSM also provides professional development opportunities for teachers throughout the state.

Maine School of Science and Mathematics has received funding for a distance learning grant to fund procurement, and installation, of distance learning equipment at 21 different sites made up of 11 districts. We are asking interested vendors to provide a proposal for the procurement, and installation, of equipment as outlined in this document. Although the grant has been awarded, it is expected the funding will be released in phases. We are asking all vendors to use the template in this document for the basis of your proposal. Vendors are encouraged to submit a proposal for all, or part, of the requested equipment, but preference will be given to vendors who submit a complete proposal. Alternative equipment will be considered.

Special Considerations

Please note, the hope is to identify one vendor to provide a turn-key solution to include procurement, installation, and ongoing support. We will consider partial proposals, but the preference is for a single solution provider. Also it is important to note the intention is to use this procurement process to select our preferred vendor. It is expected we will need to negotiate with the selected vendor, as some requirements may change due to the nature of the grant award. Further, it is important you are aware the project may be implemented in phases. It is expected the entire project to be completed over the next 2-6 months, however we cannot guarantee the timeline will not change, nor can we guarantee all equipment will be purchased. In order to ensure we receive consistent responses from all vendors for purposes of your initial response, please assume all phases of the project will be awarded. If changes are required, we will work with the selected vendor to provide an opportunity to modify your proposal.

Equipment Consideration

It is expected some part numbers/models/manufacturer may be outdated, so we are asking vendors to use the information provided to propose similar equipment or any acceptable alternative. Vendors are responsible for ensuring the proposed solution is fully functional and there are no compatibility issues. No change orders will be accepted due to vendor design errors.

SCOPE OF WORK INSTRUCTIONS

We are asking each vendor to provide a proposal; including your proposed scope of work for installing the equipment as outlined in this RFP. Please use the following as a guide:

Installation Services

- Install only required at sites where "install" provided as a line item.

Video Endpoints & Interactive Display Panel

- Unbox and dispose of waste in customer provided waste disposable location.
- Register video endpoint to cloud controller (WebEx or Zoom).
- Mount unit to Promethean display. Ensure all necessary cables are included.
- Perform a test call.
- Work with end-user site to provide up to 1hr of basic user training on how to operate equipment (there will be additional training provided to end-users)
- Documentation: Install asset tag provided by customer. If appropriate, register the unit with the manufacturer for warranty purposes, record system confirmation
- General project management
- Customer sites will be given the option of either wall mounting display or mounted on a cart. This will be determined prior to the final award. Please include wall mount brackets and option for mobile cart.

Network Equipment (wireless & switching)

- Unbox, rack and dispose of waste in customer provided waste disposable location.
- End user site is responsible for providing adequate mounting location and will be responsible for any necessary patch cables, etc.
- Configure switch with basic configuration provided to the vendor by the end-user site. It is assumed these switches will be edge switches added to an existing stack.
- Wireless AP's will be configured to end-users existing cloud solutions. It can be assumed AP's will be mounted using a provided ceiling/wall bracket no higher than 8' using existing cabling provided by the end-user site.
- Documentation: Install asset tag provided by customer. If appropriate, register the unit with the manufacturer for warranty purposes, record system confirmation.
- General project management.
- Test for general connectivity.

Chromebook/Teacher Laptop Lab

- Unbox and dispose of waste in customer provided waste disposable location.
- Configure Chromebooks to register to end-users existing Google accounts.
- Assemble Chromebook cart.
- Test

Provide Inventory Tagging and Tracking

RFP Scoring

Proposal Criteria: The following criteria example will be used to evaluate proposals. MSSM reserves the right to accept or reject any proposal and make modifications to requirements.

Vendor	Criteria	Scale 1-5 (*5 Exceeds Requirements*)
	Cost effectiveness	
	Reputation	
	Experience with similar projects	
	Ability to perform services	
	Ability to provide ongoing support	
	Total Score
