VIRTUAL ACADEMY
PROGRAM OVERVIEW

Our Mission: *Empowering each student to find success within a safe, supportive, and flexible environment.*

THE VIRTUAL LEARNER

Online learning opens the door to a flexible, personalized education—right from the comfort of home. But what does it take to truly succeed in this digital classroom?

Successful online learners are:

- **Self-Starters** – They're motivated to learn, set personal goals, and stay focused without constant reminders.
- **Organized and Responsible** – They manage their time wisely, keep track of assignments, and take ownership of their progress.
- **Confident Communicators** – They're not afraid to ask questions, share ideas, and connect with teachers —often through writing emails.
- **Tech-Savvy Explorers** – They feel comfortable navigating learning platforms, submitting assignments online, and using digital tools to stay connected.
- **Flexible and Resilient** – They adapt to challenges, try new ways of learning, and bounce back from setbacks with confidence.

With the right support from home, students of all ages can develop these traits and flourish in an online learning environment. We're here to guide them every step of the way!

OUR MODEL

Online learning is more than just logging into a computer—it's a structured, engaging, and student-centered experience.

Here's how our model works:

- **Clear Learning Goals** – Each course is built around specific academic standards and learning targets, so students always know what they're learning and why it matters.
- **Engaging Digital Content** – We use a mix of videos, readings, interactive tools, and hands-on activities to keep learning meaningful. Lessons are designed to be flexible and accessible for different learning styles.
- **Asynchronous Learning** – Students work asynchronously and independently on assignments with teacher guidance available.
- **Ongoing Teacher Support** – Our teachers actively monitor student progress, provide personalized feedback, and offer 1:1 or small-group support through virtual synchronous time and check-ins.
- **Family Partnership** – We believe learning is a team effort! Families receive weekly updates and have access to tools and tips to help support learning at home.
