General Project Information
2021 BOND

Project: New High School #10 in LUZ 2C/2D

Scope of Work to Include:

- Construct prototype high school designed for 3,000 students
- Tennis court facilities to accommodate district and regional events
- Ag barn for students at Gerald D. Young Agricultural Sciences Center

Background & Justification: The site is located east of the Katy Hockley Road and Longenbaugh Road intersection. Growth in the northwest quadrant of the District continues on an annual basis. Construction of this new campus will provide relief to existing campuses that currently house students in the surrounding attendance boundaries.
