General Project Information
2021 BOND

Project: Design Services for New Campuses

Scope of Work to Include:

- Design services for proposed new campuses to be built with (potential) 2024 Bond

Background & Justification: Funding for pre-construction architectural and engineering design services for new schools needs to be secured well ahead of actual construction. In order to open the new schools per the current rollout timeline, and anticipating a 2024 bond election to commence construction, it is necessary to implement design services for these projects now.
