

Have you heard the news?

Health Homes help keep you healthier!

We know that caring for a child or young adult with specialized needs can be challenging for families and caregivers. That's why SCO Family of Services is offering Health Home Care Management services to help families stay healthier.

What's a Health Home?

A Health Home is not a building or a place. It is a team of professionals who work together to make sure all of your child or young adult's needs are being met. The team is led by an SCO **Care Manager** who is your partner in caring for your child.

Your Care Manager will work with you to develop a care plan that lists your child's needs, goals, and the providers and services needed to reach those goals. He or she will become the point person for everyone involved in your child's care and well-being.

The Care Manager can help you make appointments. He or she can help with housing and educational needs. Your Care Manager can even connect you to programs in your community to help your family lead a healthier and happier lifestyle.

Why do I need a Health Home?

You may see many health Professionals from different agencies and multiple locations. It can be very difficult to coordinate all of that care. With SCO Care Management, a Care Manager is there to help you. He or she will make sure everyone has a full picture of your needs, goals and progress. This will lead to better results, better care, and can help avoid trips to the emergency room.

ENROLLMENT HOTLINE: 718-674-7703

SCO Family of Services helps New Yorkers build a strong foundation for the future. We get young children off to a good start, launch youth into adulthood, stabilize and strengthen families and unlock potential for children and adults with special needs. We enable New Yorkers to meet life's challenges with support, care and acceptance. SCO has played a vital role delivering human services in communities throughout New York City and Long Island for more than 100 years.

SCO Family of Services is a member of the Collaborative for Children and Families Health Home.
