SAFE HAVEN/CRISIS RESIDENTIAL UNIT

In Safe Haven, we serve residents of Schuylkill County, ages 18 and older, who are experiencing a short-term emotional or behavioral crisis. We provide a safe, supervised environment, and offer an alternative to psychiatric hospitalization. Safe Haven is open 24 hours a day, 7 days a week. We can accommodate up to eight consumers. We will provide individuals with the supports they need in order to remain in the community. We ensure a comfortable, non-judgmental atmosphere, in which one can process feelings and explore new options.

FAMILY SUPPORT UNIT

The Family Support Unit works with families of at-risk children. The program staff supports the development of and oversees a formal service plan. This plan details goals focusing on the safety and general well-being of the families involved. This service is typically court-ordered.

PEER SUPPORT PROGRAM

The Peer Support Program inspires hope of recovery for individuals age 18 and older in Monroe, Pike, and Schuylkill Counties. This program focuses on individuals with severe and persistent mental health illness. We support consumers in achieving personal wellness by helping them learn to cope with stress and barriers using a strength-based recovery support model. This model includes the use of WRAP's, or Wellness Recovery Action Plans. Services are provided by individuals who have "walked the walk" and who are in recovery themselves. They are certified to help others, and show that hope is probable, not just possible.

TRANSITION AGE PSYCHIATRIC REHABILITATION PROGRAM

The Transition Age Psychiatric Rehabilitation Program assists adults with mental illness in connecting with the community. Through participation in this recovery-based model, individuals will develop a sense of accomplishment, competency, and belonging through new and expanded roles in social, employment, and educational opportunities. Consumer choice is emphasized, as well as active participation in goal setting. Strategies to acquire skills and develop an individual support network are the cornerstones to this rehabilitative program.

RESIDENTIAL LIVING SERVICES

The ReDCo Group supports residents of Berks, Carbon, Monroe, and Schuylkill Counties by operating community living homes for adults with intellectual disabilities. Our community living homes can support one to four individuals per home. We provide a safe and nurturing environment in each of our homes and practice the philosophy that every individual has a right to live the life they choose. Family members are always welcome and invited to be a part of their loved one's life.

We are able to operate successful homes by supporting our residents in becoming fully integrated into their communities. Personal choice is paramount in our homes, as evidenced by the way the homes are arranged and decorated. Additional supports to our residents may include medical monitoring and representative payee services. Referrals should be made through Service Access and Management. Group home tours and information available upon request.

LIFE SHARING

The Life Sharing program supports adults with intellectual disabilities. This program supports both the consumer and a host family in the community that agrees to provide a caring and nurturing household for the individual. Consumers' lives are enhanced as they have the opportunity to share responsibilities, successes, and challenges that occur in the course of normal day-to-day family life. The ReDCo Group provides support and supervision to the host families.

HOME AND COMMUNITY

The Supported Living program cares for individuals in their own home or apartment, with limited assistance. The goal of this program is to support individuals who prefer to stay in their own homes, however, need some additional support. We are able to do this by providing a modest number of staff support each week to assist with housekeeping, grocery shopping, and/or transportation to appointments.

COMMUNITY PARTICIPATION SUPPORTS

The ReDCo Group Community Participation Supports program is designed to support adults with intellectual disabilities in Berks, Carbon, Luzerne, and Schuylkill Counties. The program features a central hub where participants can meet daily, and increases the opportunities for these individuals to engage in preferred and meaningful activities within their community. We are able to achieve positive outcomes by encouraging participants to give direct input into their daily activity schedule. We also have a low staff to individual ratio, which ensures that each person has ample opportunities to engage in activities they enjoy. Daily activities are a combination of community-based and facility-based activities.
