
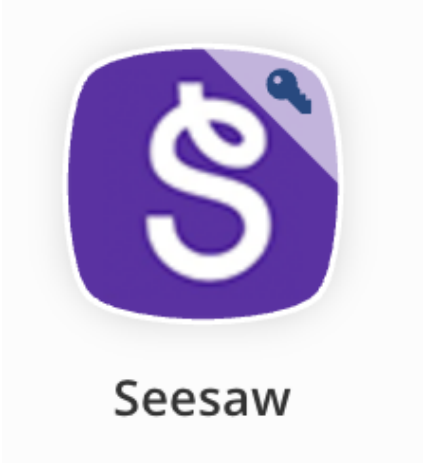
Remote Learning Instructions for Students

1. Students sign into Classlink using their QR codes

2. Students find the Seesaw logo and tap it.

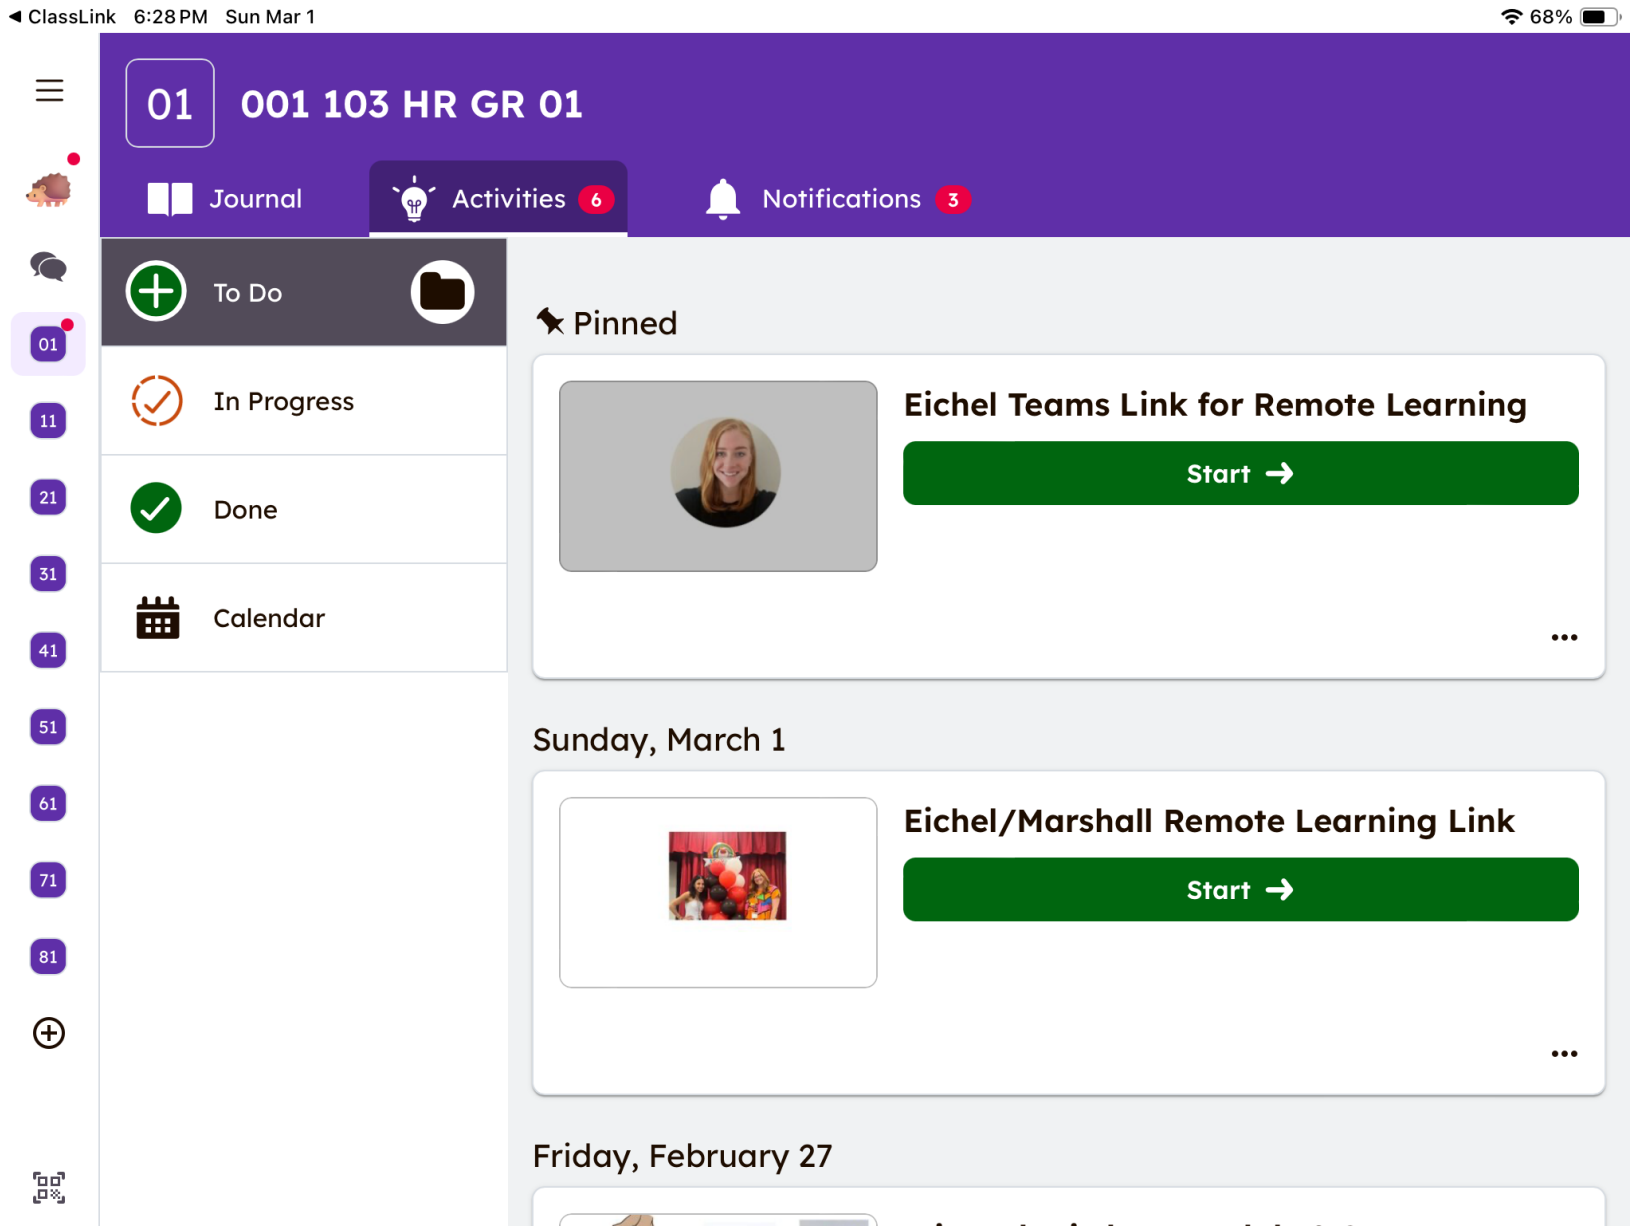


2a. Some students may be prompted a second time with a “Sign in to Seesaw button” Students should tap it.

3.

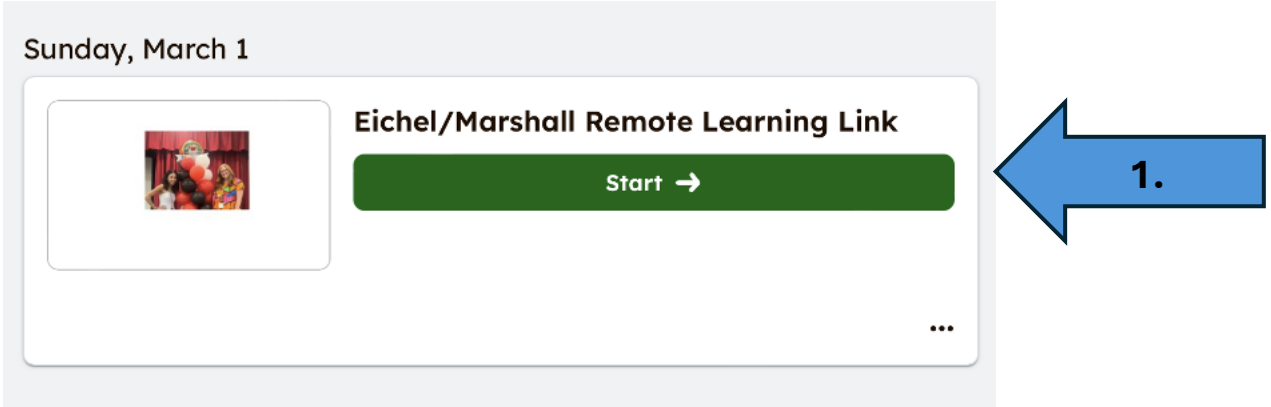
Students should automatically open up on their homeroom page. Have students navigate to **Activities** on the top to see their assigned activities.

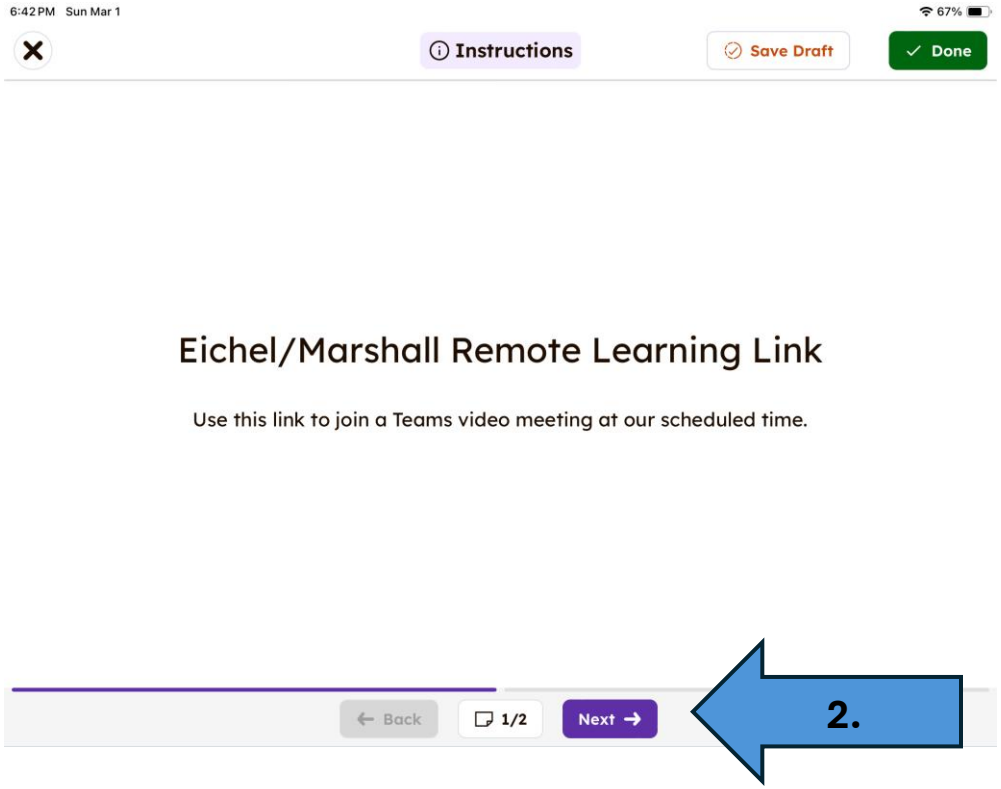
If they are not opened up to their homeroom. They can navigate to their homeroom class using the left sidebar menu. Use the three lines at the top lefthand side to expand the menu. They should only have to do that once if it's necessary.

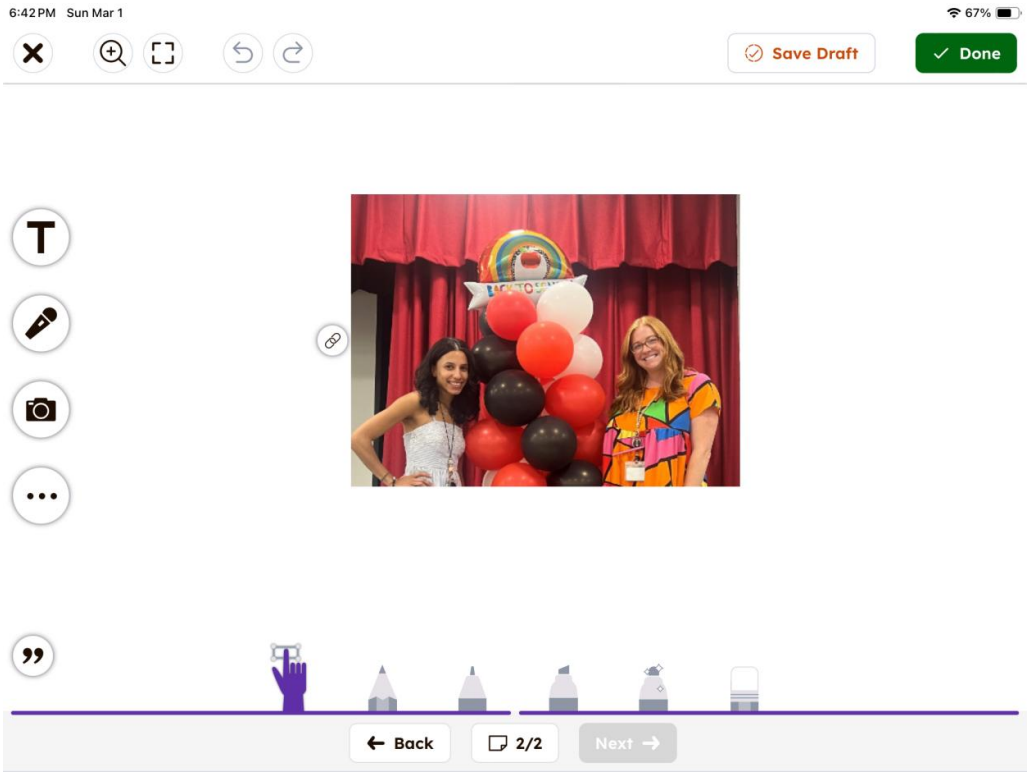


4.

Students should press start on the activity they need. Once they press start they will see an instructions page. They should hit next and then the assignment should appear.

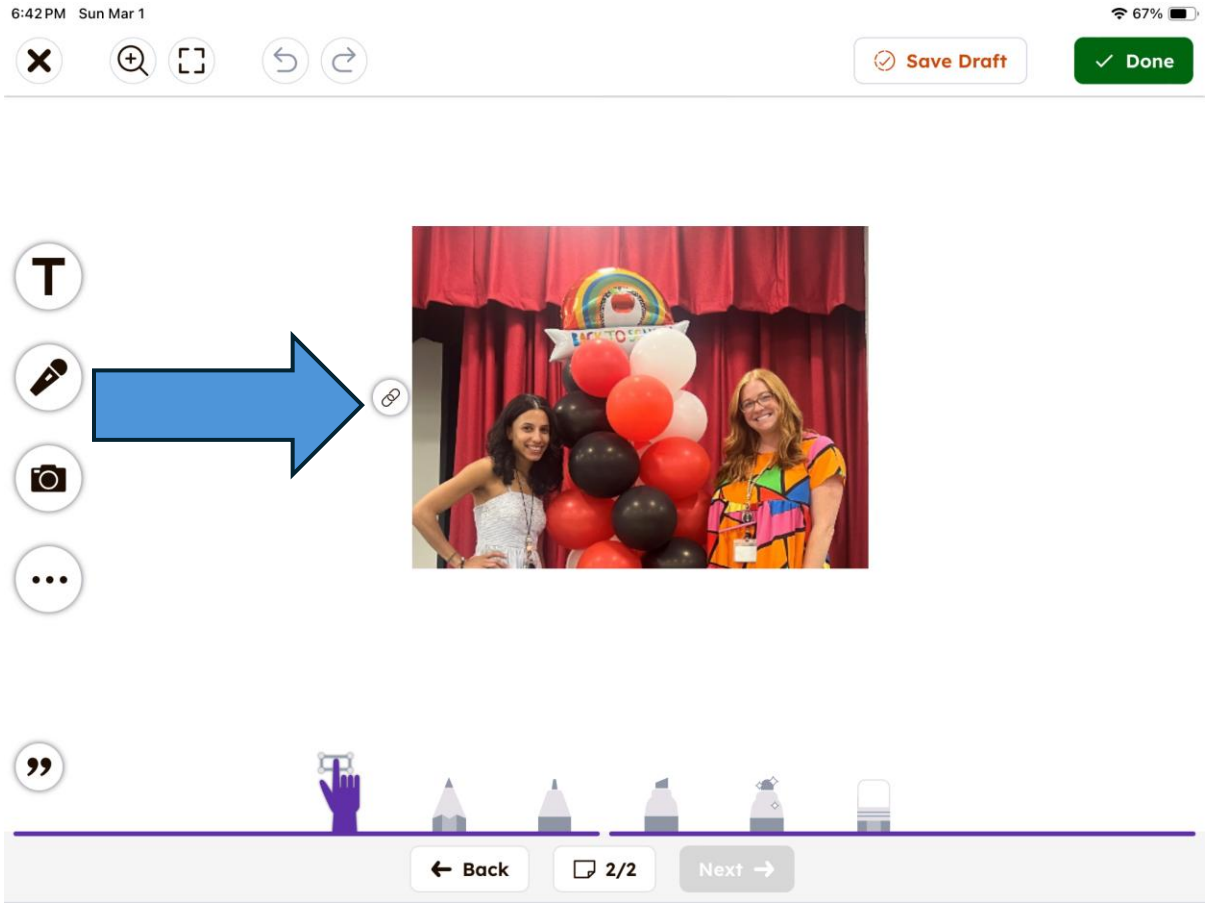


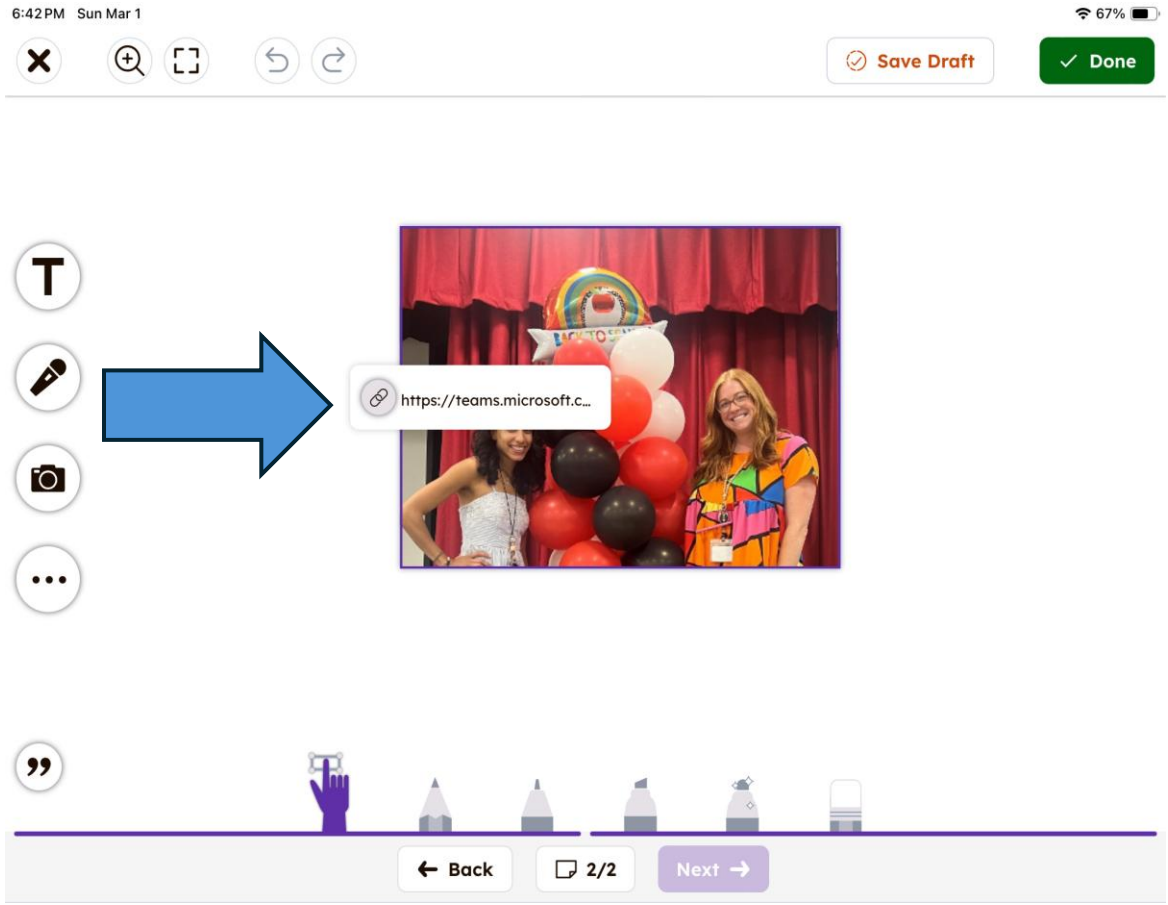




5.

Once in the assignment students should tap on the circle that looks like a link. They should then tap on the link that pops up this will open up Teams.





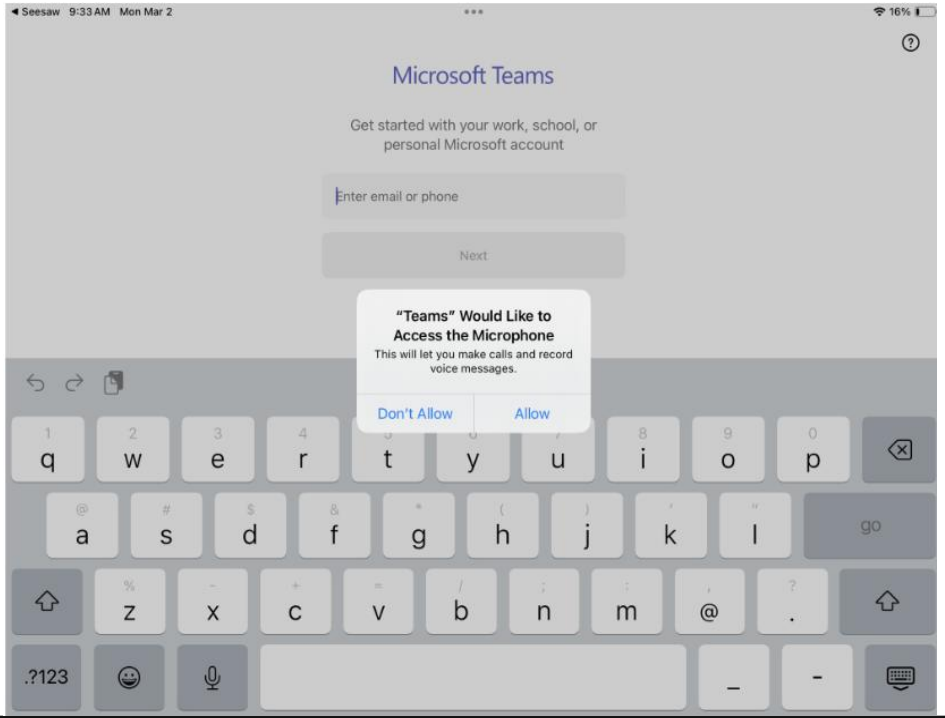
6.

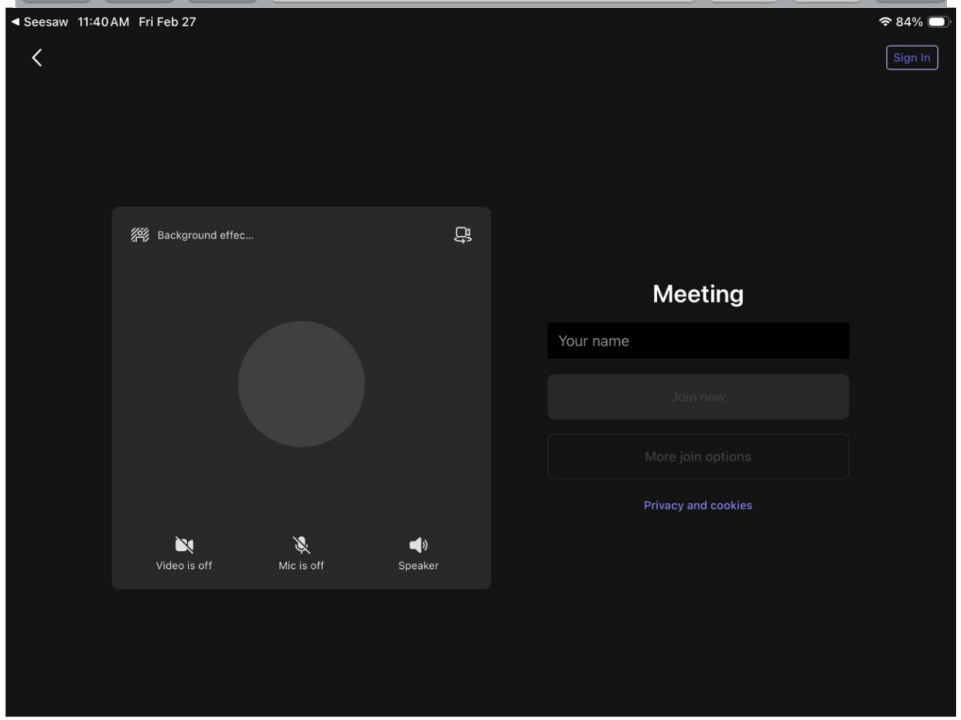
Once students tap on the link. They should open up in Teams. There are going to be some pop ups and permissions that students will have to allow in order to have a successful Teams meeting.

This only has to be done the first time.

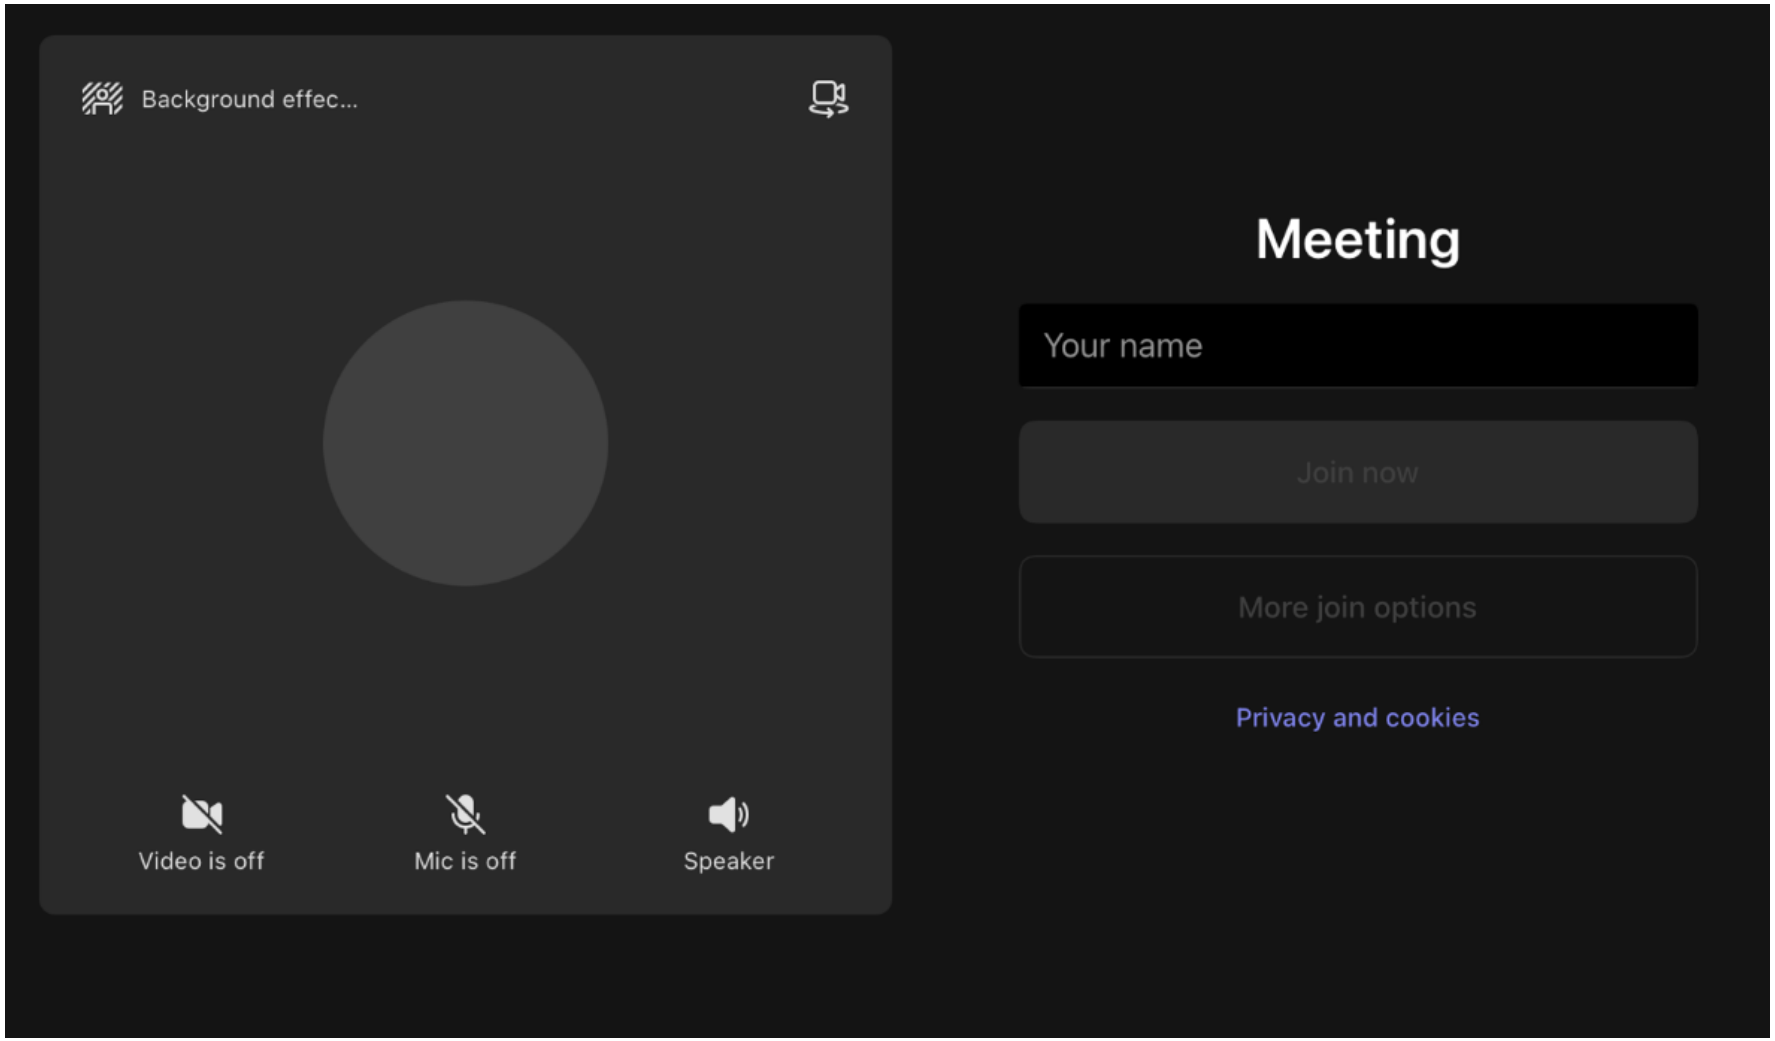
After hitting allow.

They should begin by typing their name and then hitting join now. They may see the popup on the next screen before they can hit join now.





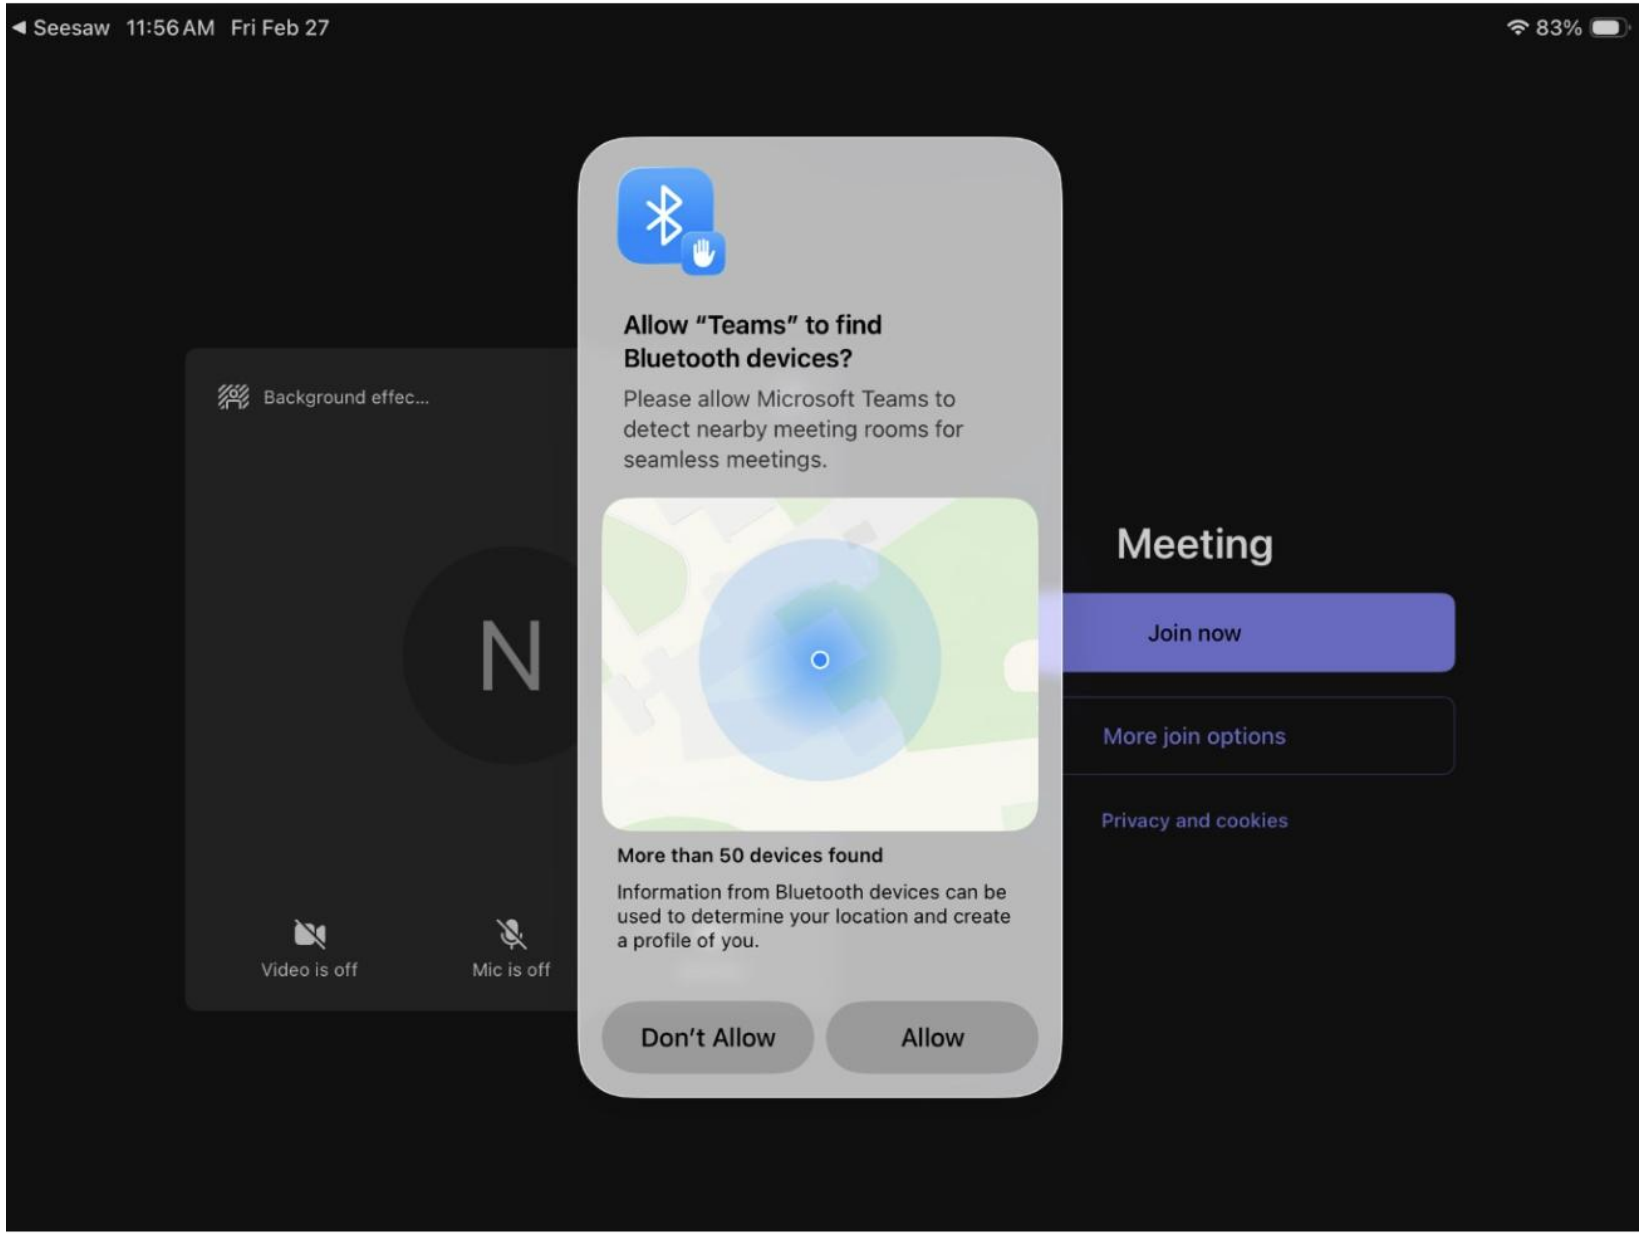
This is what students will see. The Join Now button will turn purple once they type their name.



7.

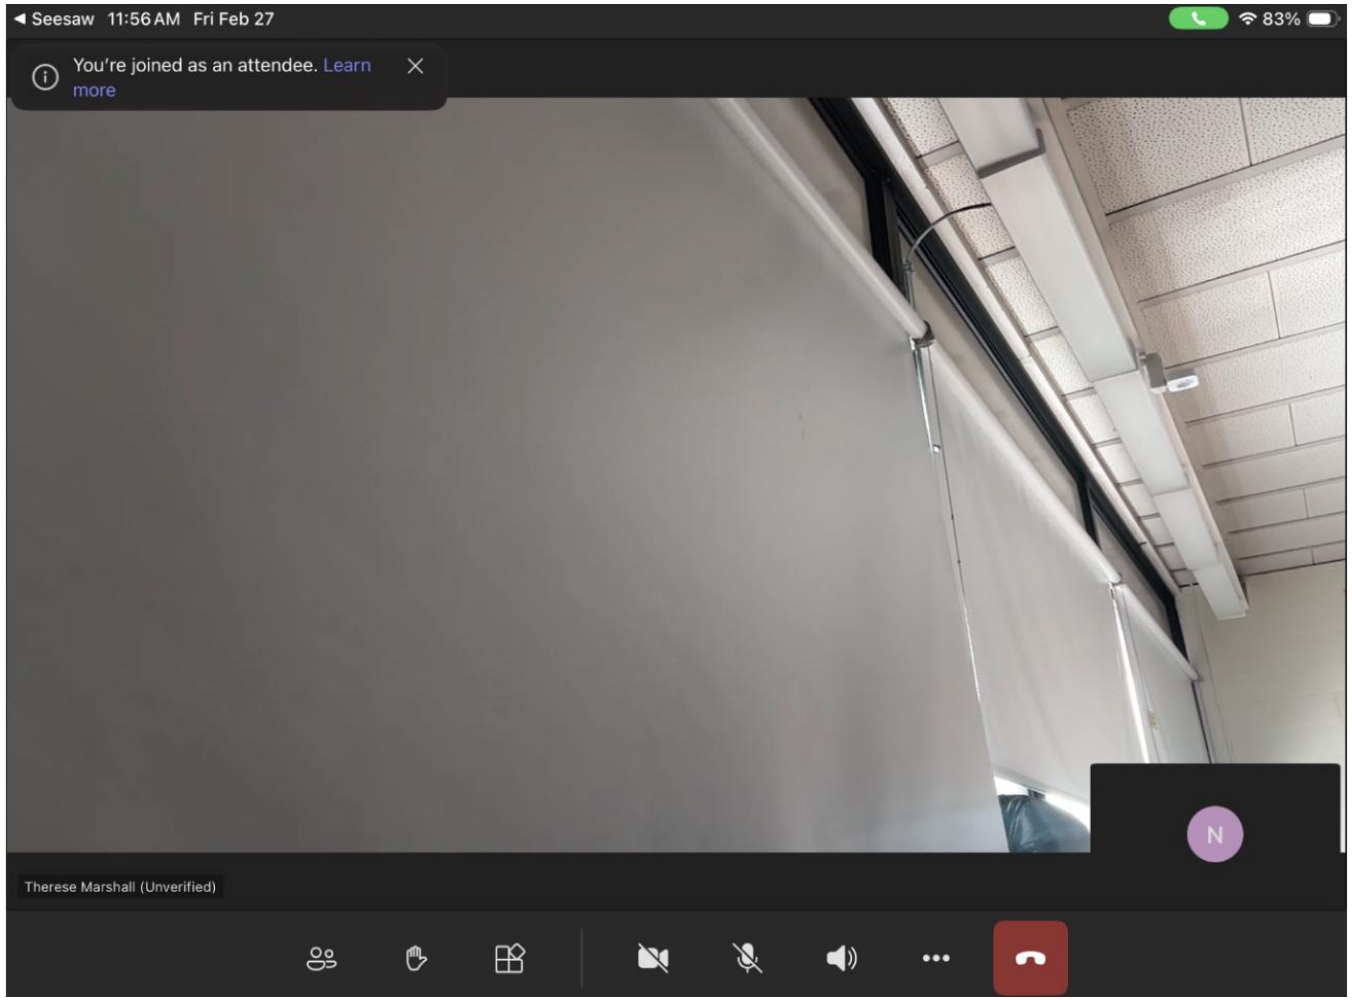
You can tap allow to any pop ups

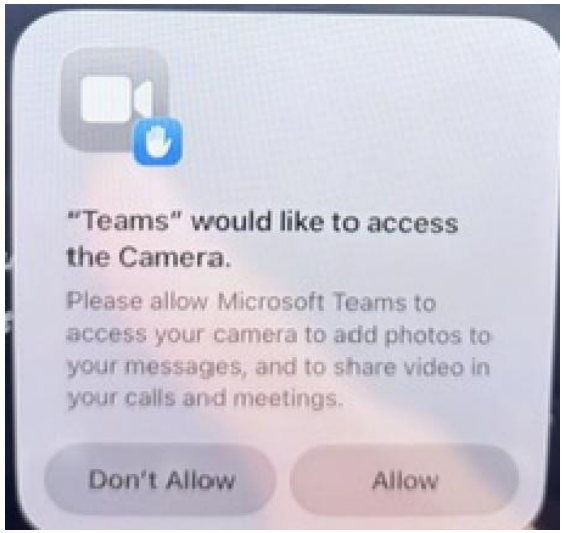
Then hit join now.

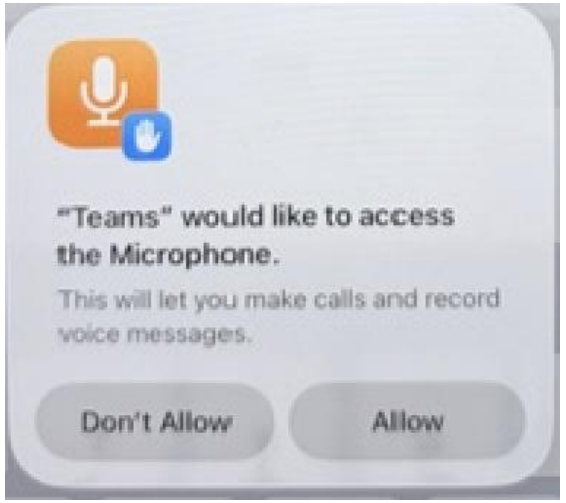


8.

This is the student view on their iPads. They should touch the camera Icon and the microphone icon. Two pop ups may happen they should hit allow for both.

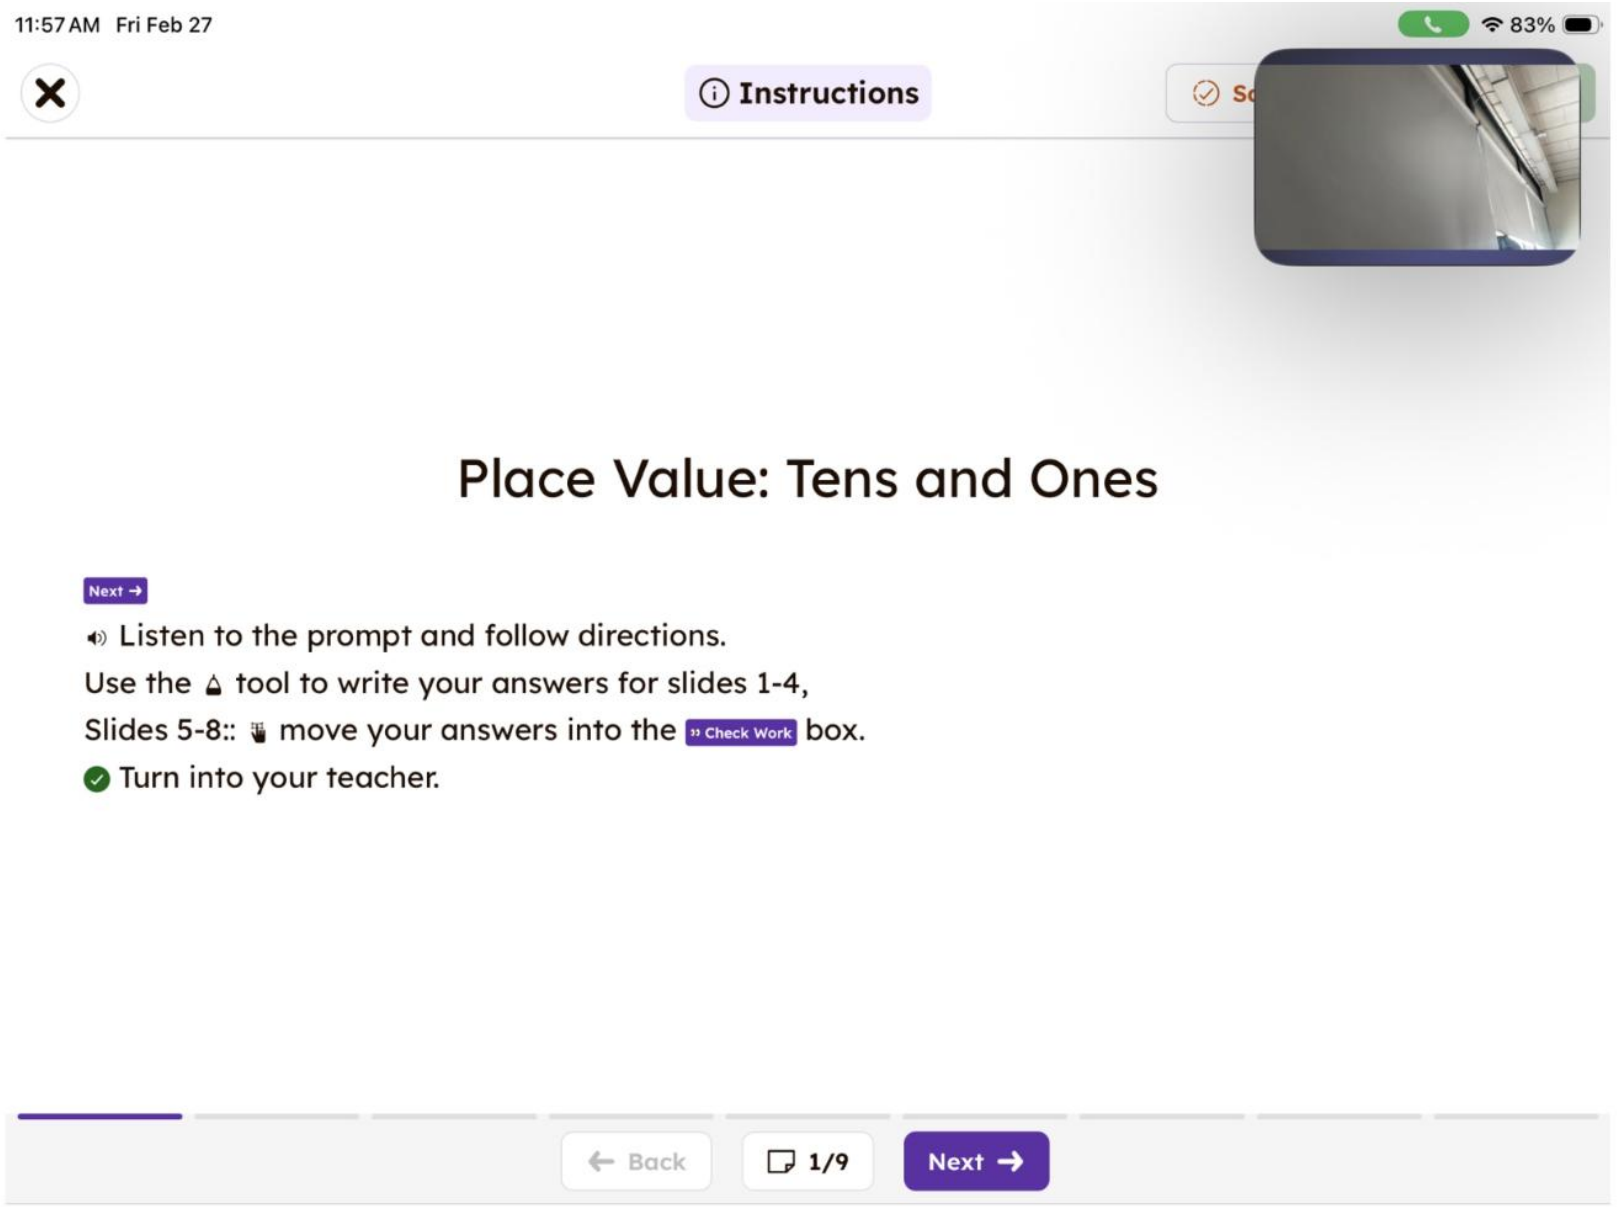






9.

FYI if students leave to do another activity while on the call such as IXL or a SeeSaw activity. The Teams call will minimize itself and remain on the screen of the activity.



10.

Use this screen to show students the tools on teams such as camera and microphone.
