WESTCHESTER
COUNTRY DAY SCHOOL

Rising AP Chemistry Summer Reading

This summer assignment is to complete the first four lessons of AP Chemistry (1.1-1.4). These lessons review essential concepts learned in Honors Chemistry. Students should have received the physical lesson packets from me at the end of the school year *(email me if you need another copy)*.

As this is meant to jump-start the school year and get students' brains re-focused on the prerequisite skills they need for the course, students **should not complete the assignment until close to the start of the school year**. As such, students will receive an email from me 2-3 weeks prior to the start of the first day of school containing links to the notes that I have made to guide them through filling out their own notes for each lesson packet.

After completing the notes, students will attempt the practice problems to the best of their ability. On the first day of class, we will review the practice problems together and receive a completion-based grade for the assignment. The first quiz of the school year will cover these lessons.
