

SUMMER WORK -

For some of our classes, summer work is required. This required summer work is assigned in order to ensure that students have had exposure to the material, practice with the concepts, and are best positioned for success in the class.

Please check below to see if there is summer work required for any classes in which you are enrolled. This work should be completed prior to the start of school or by the deadlines indicated on the assignment directions.

[Freshman Math - ALL CLASSES](#)

[AP Literature - Dr. Durkin](#)

[APUSH \(AP US HISTORY\) - Mrs. Silverstein](#)

[AP Chemistry - Ms. Beck](#)

All new students - 3 summer digital workshops

We will be sending out links to three digital “workshops” for incoming students to complete. The topics are Community and Honor, Technology, and Academic Success. They are interactive and require digital responses.

Links will be emailed to the student’s SEM email address with copies being sent to parents. Students will need to use the link in their own SEM email, and be logged into their SEM Google account in order to submit the required responses.

Laptop pickup will begin on August 22. Students will sign up for one of several offered hour-long tech orientation sessions in which the laptops will be distributed. The sign-up sheets will be sent as part of the August mailing.
