FARM TO SCHOOL

HARVEST OF THE MONTH

• Daily Assortment of Cereal Offered at Breakfast •

The following major food allergens may be used as ingredients in this facility: Milk, egg, fish, crustacean shellfish, tree nuts, peanuts, wheat, soy, and sesame. Please notify a staff member if you require additional information about specific ingredients.

If your child has a peanut allergy on PB& J days, soy butter sandwiches are available upon request. Please let your child's teacher know to request the soy butter sandwich, if desired (peanut free, but contains milk, wheat, and soy).

USDA is an equal opportunity provider, employer, and lender.

CITRUS

Citrus fruits are a member of the Rutaceae family of plants.

Citrus fruits grow on flowering shrubs or trees. It takes around 4 years after it is planted before a tree will start producing significant amounts of citrus.

The benefits of citrus are found in more than just the juice. Have you ever tried to see how many pieces of fruit that it takes to squeeze into a glass of juice? Try it and determine if you would you ever eat that many pieces of fruit in one sitting!

Citrus plants are in season in Georgia from around November through December.

Georgia is now growing many varieties of citrus and the industry is expected to only continue to expand, allowing for more Georgia Grown citrus availability in the coming years.

The southern portion of the state produces most of Georgia's citrus.
