She explained how this helps to save her time and helps students in her class. With a diverse amount of needs, AI allows her to tailor lessons for individual students and translate pieces into their native language, highlighting vocabulary words to assist in their learning, ultimately allowing them to stay on pace with the learning.

The programs were demonstrated by Chris and allowed us to see the many benefits of their use. As we continue to grow in our knowledge of AI, it is refreshing to see the positive benefits of its use.
