Integrated Pest Management

In the best interest of the students and staff of Regional School District No. 17 schools, the use of pesticides shall be minimized within our buildings and on our grounds.

Pests shall be managed in accordance with the Integrated Pest Management Plan of Regional School District No. 17 schools. Whenever a natural or non-chemical means is available to effectively control the problem at a reasonable cost, it will be used. Pesticide applications will only be done as frequently as needed to control the situation and in all cases strengths will be the minimum required. All applications will be done by people licensed for such work and detailed records will be kept of all such applications. Records of all applications shall be maintained in each building and shall be made available to interested parties.

Notification of planned pesticide applications will be provided in accordance with applicable laws.
