FUYU PERSIMMON

DID YOU KNOW?

- Fuyu Persimmons, botanically classified as Diospyros kaki, belong to the Ebenaceae family.
- Persimmons are a round fruit and look like a cross between a tomato and an orange, but are actually more closely related to apples.
- Persimmons have a juicy sweet taste and can be eaten whole, like an apple.
- This brightly colored, glossy orange red skinned fruit is an excellent source of vitamin A, a good source of vitamin C, and rich in fiber.

FUN FACT!

Persimmons are considered lucky in China and are often given as gifts at weddings.
