Campus Improvement Plan (CIP) Meeting

MINUTES FORM

CAMPUS NAME: Laurenzo ECC

MEETING LOCATION: Library

DATE AND TIME: February 27, 2026 11:00 am

PERSON RECORDING MINUTES: Angelina Avila

MINUTES:

The meeting began with a review of the March calendar and upcoming events. Key dates and activities for the month were discussed, ensuring alignment with instructional priorities and family engagement efforts. The team revisited plans for the Title I meeting and other campus events scheduled for March, emphasizing the importance of communication and parent involvement.The Campus Sentiment Survey was revisited as part of ongoing monitoring efforts. The discussions focused on maintaining strong participation and continuing to build on the positive feedback areas identified previously, including safety, communication, and special education support. The team discussed preparing for the upcoming campus-based survey to gather more targeted feedback from families and staff, ensuring that areas of growth are addressed proactively.The conversation then transitioned to school needs, with a particular focus on updated garden developments. Two contractors have assessed the irrigation system, and it was determined that HISD approval is required because the work involves modifications to the facility. The projected cost for the irrigation system is approximately $3,000, with a goal of having it operational by April. In addition to irrigation, the garden area will require leveling to ensure proper drainage and safety. Plans were also discussed to install privacy hedges along the recess area to enhance both security and the overall appearance of the space.PTO support continues to play a vital role in campus initiatives. The PTO is currently assisting with preparations for the upcoming Easter Egg Hunt, including providing prizes for activity stations and food for the event. Efforts to increase flyer distribution were discussed, with a focus on sending additional flyers home with parents. Staples has been utilized to ensure flyers are printed and distributed efficiently.

PARENT SUGGESTIONS/RESPONSES:

Additionally, outreach efforts will include community presence on Sundays at Buey y Vaca from 10:00 AM to 12:00 PM, with Reyna and Solis volunteering to represent the school.Enrollment remains a major priority as the campus works toward increasing Pre-K enrollment. Recruitment strategies discussed previously will continue, with a renewed push throughout March. The team emphasized consistent community outreach, increased visibility at local businesses and community events, and leveraging parent networks to promote the school. Providing families with promotional materials and encouraging them to share information continues to be a key strategy.The meeting concluded with reaffirmed goals for strengthening enrollment, enhancing campus facilities, and maintaining strong family engagement throughout the month of March.
