Memorandum

To: Michael Gaal
Superintendent, Colorado Springs School District 11

From: Brandan Comfort
Deputy Superintendent, Colorado Springs School District 11

Date: November 18, 2026

Subject: School Year 2026-2027 Capacity Committee Report

As stated in Policy JC: School Attendance Areas and School Building Capacity are presented as an annual update to the Board of Education during the first semester of each school year.

The School Year 2026-2027 (SY26/27) Capacity Committee is comprised of the following individuals:

Anthony Karr	Executive Director of School Operations
Dr. Gregory Ecks	Senior Director of Data Science
Jennifer Hotaling	Capital Program Manager
Lindsay Jimenez	Principal, Grant Elementary School
Kristina North	Business Teacher, Jenkins Middle School
Blake Hesselberg	Assistant Principal, Mann Middle School
Ricky Lobato	Assistant Principal, Coronado High School
Terrie Blackwell	Administrative Assistant, Mitchell High School
Angela Prochnow	Principal, Buena Vista Montessori
Nicholas Schultz	Assistant Principal, Galileo Middle School
Lindsay Smart	Principal, Rogers Elementary School
Christopher Krueger	Assistant Principal, Jenkins Middle School

Attached are the following documents related to the SY26/27 capacity report:

1. Co-Location Protocol
2. School Building Capacity Model
3. School Building Capacity and Enrollment Reports
    - Enrollment Data
    - Permit Data
    - School Utilization Rate
    - House Bill 16-1422 Section 12 Data

Executive Summary

The Capacity Committee updated the District 11 School Building Detail Reports to reflect an automation of Enrollment and Permit data as living and breathing information. Meaning, the enrollment and permit information published on the School Building Capacity and Enrollment Reports is automatically populated on the day the report was pulled and no longer based on the static October Count. These reports are then able to be pulled and analyzed with accurate information throughout the school year.

The SY26/27 Capacity Committee was charged with automating the data analyses, developing, in alignment with the co-location strategy initiated in SY25/26, a co-location protocol, and comply with House Bill 16-1422 Section 12.

Notable school capacity data analyses of enrollment, permitting, utilization, and compliance with House Bill 16-1422 Section 12 are called out below.

Enrollment

When enrollment is examined on a school-by-school basis, outliers are evident in two main ways, the year-over-year count change and the year-over-year count change as a rate of change. Enrollment examined as a strict number is important for site-based-budgeting; while examined as rate of change is more useful for trend analysis.

Enrollment Table A shows the high and low ends of our year-over-year count changes (school enrollment increases and decreases from last year):

Enrollment Table A

Top 10 Increases		Top 10 Decreases	
North Middle School	45	General William J. Palmer High School	-135
Oliver Wendell Holmes Middle School	25	Florence R. Sabin Middle School	-120
Irving Howbert Elementary School	23	Thomas B. Doherty High School	-75
Dr. Martin Luther King Jr. Elementary School	21	General William Mitchell High School	-72
Anna M. Rudy Elementary School	21	Jack Swigert Middle School	-58
Trailblazer Elementary School	20	Andrew Jackson Elementary School	-54
Queen Palmer Elementary School	14	West Middle School	-43
Mark Twain Elementary School	14	Galileo Middle School	-39
Columbia Elementary School	10	Helen Keller Elementary School	-36
Ulysses S. Grant Elementary School	10	Alice Bemis Taylor Elementary School	-33

Enrollment Table B shows the high and low ends of our year-over-year rate of changes (enrollment increases and decreases from last year as a percentage of the 2025 student count):

Enrollment Table B

Top 10 Increases		Top 10 Decreases	
Trailblazer Elementary School	9%	West Middle School	-31%
Irving Howbert Elementary School	8%	Florence R. Sabin Middle School	-21%
North Middle School	7%	Alice Bemis Taylor Elementary School	-20%
Dr. Martin Luther King Jr. Elementary School	6%	Andrew Jackson Elementary School	-15%
Queen Palmer Elementary School	6%	Galileo Middle School	-15%
Anna M. Rudy Elementary School	5%	Jack Swigert Middle School	-15%
Mark Twain Elementary School	4%	West Elementary School	-14%
Oliver Wendell Holmes Middle School	4%	Horace Mann Middle School	-13%
Ulysses S. Grant Elementary School	3%	General William J. Palmer High School	-11%
Columbia Elementary School	3%	General William Mitchell High School	-11%

Permitting

A simple formula of permits in minus permits out is used to examine permit activity. Schools with net positive permit totals bring in more choice enrollment than enrollment lost to choice. A net negative permit result is the opposite.

Permitting Table A identifies the top 10 schools with net positive permit totals and the top 10 schools with net negative permit totals:

Permitting Table A

Top Net Positive Permit Totals		Top Net Negative Permit Totals	
Thomas B. Doherty High School	354	General William Mitchell High School	-1290
North Middle School	291	Galileo Middle School	-245
Frances L. Jenkins Middle School	266	Horace Mann Middle School	-186
Buena Vista Elementary School	250	West Elementary School	-152
Winfield Scott Stratton Elementary School	189	John C. Fremont Elementary School	-150
Oliver Wendell Holmes Middle School	177	Jack Swigert Middle School	-150
Chipeta Elementary School	168	Florence R. Sabin Middle School	-126
Charles M. Russell Middle School	143	George Washington Carver Elementary School	-120
Benjamin Steele Elementary School	140	Mark Twain Elementary School	-115
Anna M. Rudy Elementary School	140	John Adams Elementary School	-112

Utilization

Finally, utilization demonstrates where efficiencies in using the District's resources are optimized; or, with further analyses, where co-location strategies may provide for different benefits for the community's students. Some of our schools have utilization percentages that include the increased capacity from portables. Where portables are no longer needed due to enrollment changes, they will analyzed for potential removal.

Utilization Table A identifies the 10 most utilized schools the 10 least utilized:

Utilization Table A

Most Utilized		Least Utilized	
Benjamin Steele Elementary School	104%	West Middle School	22%
Oliver Wendell Holmes Middle School	94%	General William Mitchell High School	32%
Richard C. Bristol Elementary School	93%	Galileo Middle School	34%
North Middle School	92%	West Elementary School	34%
Columbia Elementary School	92%	Horace Mann Middle School	38%
Christa McAuliffe Elementary School	90%	Alice Bemis Taylor Elementary School	42%
Anna M. Rudy Elementary School	90%	Midland Elementary School	42%
Lt. Col. Thomas H. Martinez Elementary School	89%	George Washington Carver Elementary School	45%
Buena Vista Elementary School	89%	Florence R. Sabin Middle School	49%
Irving Howbert Elementary School	85%	Mark Twain Elementary School	51%

House Bill 16-1422 Section 12

Legislation (House Bill 16-1422 Section 12) was passed in the Spring of 2016, which reads, in part:

> No later than November 1st of each year, the District shall prepare a list of vacant or underused buildings and provide the list, upon request, to charter schools authorized by the District, charter school applicants, and other interested persons.
>
> A building is considered underused if it has an unused functional capacity to accommodate 250 students or more.

Schools identified as having 250 or more available seats are:

- General William Mitchell High School 1,150 seats
- West K-8 Campus 550 seats
- Roy J. Wasson Academic Campus 500 seats
- General William J. Palmer High School 475 seats
- Florence R. Sabin Middle School 450 seats
- Horace Mann Middle School 430 seats
- Francisco Vasquez de Coronado High School 430 seats
- Jack Swigert Middle School 415 seats
- Thomas B. Doherty High School 380 seats
- Galileo Middle School 380 seats
- Mark Twain Elementary School 300 seats

2025-2026 Capacity Committee Recommendation Update

- 2025-2026 Recommendation: Portable buildings will be removed from underutilized Elementary Schools. More analysis with Principals and Area Superintendents will take place to finalize this action plan.
  - 2026 Update: All or some portable buildings have been decommissioned and removed, or are in the process of being removed, at the following schools.
    - Carver
    - Fremont
    - Jackson
    - Penrose
    - Wilson
- 2025-2026 Recommendation: Continue and expand co-location opportunities, capitalizing on the portfolio model's success, with D11 Charter and Community partnerships.
  - 2026 Update: Co-location of East Hills Academy with Mann Middle School, and Orton Academy at Trailblazer Elementary School. Discussions with Pikes Peak State College at the Roy J. Wasson Academic Campus are ongoing.

2026-2027 Capacity Committee Recommendations

- Continue and expand co-location opportunities with particular attention at sites not implementing a D11 Academic Pathway and / or at sites that do not house an existing partnership
- Implement the attached School Co-Location Protocol where needed

CAPACITY COMMITTEE | SCHOOL YEAR 2026–2027

D11 Co-Location Protocol

D11 conducts an annual capacity process in accordance with district policy and state statute.

Commitments

District Leadership

- Comply with House Bill 16-1422, Section 12
  - Share data with principals on or around November 1
  - Publish on the capacity website on or around November 1
  - Provide to charter schools and other interested parties upon request
- Establish timelines with school leadership and co-locator leadership
- Support individual school leadership teams in identifying co-location partnership opportunities
- Provide Board of Education proposals and preferred decision deadlines
- Complete a site-based analysis with school leadership
- Create a co-location plan that includes logistical and operational agreements and dual-benefit arrangements

School Leadership and Co-Locator

- Establish timelines with district leadership and co-locator leadership
- Complete a feasibility inventory with district leadership
- Establish a community involvement plan aligned to a series of steering and/or informational meetings
- Establish a staff communication plan through a series of informative notifications
- Create a co-location plan that includes logistical and operational agreements and dual-benefit arrangements

Site-Based Analysis

Each potential co-location is reviewed with school leadership through four inventories.

1 Feasibility Inventory

- Building configuration and separation

2 Infrastructure Inventory

- Room design and available capacity
- Shared facilities
- Program-specific space and equipment
- Infrastructure readiness

3 Operational Systems Inventory

- Staffing and operational support
- Office, reception, and visitor access
- Bell schedules and transportation

4 Existing Partnerships Inventory

- Existing partnerships and facility use

Colorado Springs School District 11 School Student Capacity Model

Update November 2026

Purpose

The development of the School Student Capacity Model is in response to direction and guidance provided in Policy JC, School Attendance Areas and School Building Capacity, and its supporting regulation JC-R. The designed model is in conjunction with Policy JFBA/JFBB, School Choice Open Enrollment, and its supporting regulation JFBA/JFBB-R. The purpose of defining and publishing a School Student Capacity Model is to define the D11 methodology for determining available student capacities at our schools. When used in conjunction with enrollment data, this model provides information valuable for supporting the district mission.

Basic Concept, Definitions, and Key Terminology

In general, this model uses an equation to arrive at the overall student capacity number. The equation starts with the total number of Teaching Stations and expands to create four distinct determinations – Program Capacity, Functional Capacity, School Utilization Percentage, and Enrollment vs. Capacity.

Teaching Stations

- Spaces that are at least 600 square feet in size (ideally should be 650 square feet or greater) and can be used for instructional purposes and counted as "Teaching Stations." A floor plan and spreadsheet of classrooms for each school facility show all the spaces counted as Teaching Stations. A variance of down to 540 square feet per teaching station is admissible.
- Smaller spaces of at least 100 square feet in size that do not have a specialized non- instructional use and are suitable for modern instructional purposes. But, such spaces are not combined to form full Teaching Stations, and, therefore, do not factor into the building's student capacity.
- Common areas, such as teachers' lounges, cafeterias, and media centers, are not Teaching Stations.

Program Capacity

Program capacity is a reduced number of Teaching Stations after calculating program adjustments. Program adjustments are a standardized rate for all schools at the associated level, and affirm the fact that when our portfolio of schools' were originally designed and built, they did not design and build taking into account modern educational programming needs. Program capacity considers modern educational needs associated with curriculum and instruction changes and a range of programming that serve diverse student demographics.

Elementary School Standardized Adjustment Rate = 30%
Middle School Standardized Adjustment Rate = 20%
High School Standardized Adjustment Rate = 15%

Program capacity is Teaching Stations - (Teaching Stations x Standardized Rate)

Functional Capacity

Functional capacity is the product of a school's program capacity and the school level operational factor. The operational factor considers desired levels of schedule flexibility, teacher planning, and bell schedules. The functional capacity then accurately describes the overall student capacity level because it considers both antiquated existing facility infrastructure and operational systems in schools.

Elementary School operational factor = 1.0
Middle School operational factor = 0.75
High School operational factor = 0.85

Functional capacity is (Program Capacity x Students Per Classroom) x Operational Factor

School Utilization Percentage
The school utilization percentage is equal to the school enrollment divided by the school's functional capacity. A school's utilization percentage is calculated with and without the Teaching Stations provided by portables.

Enrollment vs. Capacity
This report item is used for the purposes of complying with House Bill 16-1422 Section 12; or the specific identification of whether a school has 250 or more open seats.

This is determined by calculating the Functional Capacity minus the Average Enrollment.

Model Specifics

Elementary Schools
Gymnasiums are not counted as Teaching Stations for elementary schools; most of these also operate as the cafeteria. Configured auditoriums are not counted as Teaching Stations since they cannot typically be scheduled for regular classes.

At the elementary level, the functional capacity is the same as the program capacity because of the 1.0 operational factor. The 1.0 operational factor is because students generally stay in one classroom except for traveling to their specials classes.

Middle Schools
Stages and fixed auditoriums are not counted as Teaching Stations. Gymnasiums are counted as Teaching Stations, with some of the larger gymnasiums counting as two Teaching Stations because they can accommodate two classes simultaneously.

All traditional D-11 middle schools house grades 6-8 and operate instructionally on the middle school concept. Exploratory class teaching stations are treated the same as core academic core teaching stations; but, middle school scheduling constraints reduce the ability for students to utilize individual rooms throughout the day. Therefore, the Middle School Operational Factor, 0.75, is used for calculating functional capacity.

Comprehensive High Schools
Auditoriums and gymnasiums count as Teaching Stations at the high school level, with some of the larger gymnasiums counting as two Teaching Stations because they can accommodate two classes simultaneously.

All comprehensive D-11 high schools house grades 9-12 and operate instructionally on standard high school concepts. Similar to middle school schedules, high school scheduling constraints and other factors reduce the effective utilization of individual rooms. Therefore, the High School Operational Factor, 0.85, is used for calculating functional capacity.

Opportunity Schools
The Capacity Committee recognizes the special circumstances and instructional approaches for unique/alternative educational facilities, such as the Roy J. Wasson Academic Campus and Tesla EOS.

The Roy J. Wasson Academic Campus and Tesla Educational Opportunity School functional capacities are assumed into a lower Students per Classroom number, set at 21 students per classroom. Student capacity for those sites is simply Teaching Stations x 21.
