COLORADO BIOSCIENCE INSTITUTE

COLORADO SUCCEEDS

APPLICATIONS OPEN

Take the next step in your life sciences manufacturing career.

LIFE SCIENCES MANUFACTURING (LSM) 101

LSM 101 is an introduction to Colorado's life sciences industries including history and applications of each industry, patient advocacy, industry documentation practices, regulatory agencies and audits, cleanroom behaviors, personal protective equipment (PPE), and how to work safely with a quality focus while working on various schedules. LSM 101 is intended to prepare learners for entry-level life sciences manufacturing roles such as production associate.

Dates: January 25-28 and February 1-2
Time: 4:30 – 7:00 pm MT
Location: Ranum Innovation Campus

LIFE SCIENCES MANUFACTURING (LSM) 201

LSM 201 is an intermediate training designed to build on foundational life sciences manufacturing knowledge, covering GMP systems and departments, Operational Excellence, Environmental Health and Safety, sampling, process control systems, facility design and controls, cleaning, sanitization and sterilization, and lockout/tagout. Designed for participants who have completed LSM 101 or have previous life sciences manufacturing experience.

Dates: February 3-4, 8-11, and 16-18
Time: 4:30 – 7:00 pm MT
Location: Ranum Innovation Campus

LSM 101 and 201 provide a progressive pathway for individuals to enter and advance within life sciences manufacturing—biotech, pharmaceutical, and medical devices. Colorado BioScience Institute and Colorado Succeeds support the coordination and delivery of the trainings, which are taught by industry expert instructors. Both programs are being offered through a scholarship model.
