A Portrait of a Graduate…

- Is a document framed in the collective vision of our community - educators, parents, students, community members

- Identifies the 21st century academic skills, character traits and social-emotional competencies that our students will need to succeed in college, career, and life.

- Speaks to *all* of our students and reinforces our commitment to supporting each of them in the offerings we provide and the pathways they pursue during their educational years K-12.

- Takes us from where we <u>are</u> to where we want <u>to be.</u>
