I'd like to request a review of this policy.

These topics are being covered in the Elementary School health class, but I question whether the curriculum has been vetted.

The former superintendent hired a health teacher in the Summer of 2023 but this policy has not been updated since 2018, according to the online policy manual.

I don't recall the former superintendent asking for SC approval of the materials.

It's unclear what curriculum materials are being used and the policy states:

"The curriculum, instructional materials and outcomes used in this program shall be recommended by the Superintendent and approved by the School Committee"
