To: Interim Superintendent Al Ganem and the BBRSD School Committee
From: Joseph Sposato, Director of Technology
Date: September 9, 2025
Regarding: Report to the the School Committee regarding Technology
Technology Update August

School Committee Members and Superintendent Ganem,

I wanted to provide a brief update on current technology initiatives and progress across the district:

- **State Reporting**: All required state reporting has been completed and certified.
- **School Year Opening Support**: The technology department has been actively assisting with the start of the school year. To date, 97 of 113 help desk tickets have been resolved, with the remaining in process.
- **Security Camera Installation**: Work is ongoing at the two elementary schools. All hard wiring has been completed; however, our vendor is awaiting delivery of mounting equipment to finalize installation.
- **Content Filtering & Monitoring (Securly)**: The rollout of our new Securly platform is complete. The next phase includes training and support for faculty, staff, and administrators, followed by providing families with information about **Securly Home**, a companion app that allows parents to monitor and support their child's online activity.

Please let me know if you would like additional details on any of these items.
