01/11/2026

The Berlin Boylston Regional School District is pleased to announce the rollout of **Securly Home**, a new program designed to give parents greater visibility into and control over their child's internet use at home.

Securly Home allows parents to manage internet activity on **school issued devices** as well as **personal Chromebooks used at home**, as long as the student is logged into their BBRSD student account. This tool is intended to support families in creating healthy digital habits and ensuring a safe online experience outside of school hours.

With Securly Home, parents can access a variety of helpful features, including:

- **Activity Feed:** View your child's recent online activity, such as websites visited, search terms, and videos watched on their school device.
- **Web Filtering:** Block specific websites or entire categories of content that you feel are not appropriate for your child.
- **Time Management:** Easily turn internet access on or off, or schedule offline times such as during homework, dinner, or bedtime.
- **Alerts & Notifications:** Receive alerts if your child's online activity includes content related to bullying, self-harm, or other concerning topics, allowing families to address issues early and have meaningful conversations.
- **Customization:** Set individual rules and preferences tailored specifically to your child and their school device.

These features are available to parents through the Securly Home mobile app and can be used while your child is **at home or outside of school**. Please note that during the school day, the district's internet safety and filtering settings will take priority to ensure a consistent and secure learning environment.

Securly Home is offered as a **free service** to all district families and is recommended for families with students in **grades 3 and up**. Participation is optional. If you would like to enroll, please complete the linked [Enrollment Form](#).

Families with more than one student should submit the form once for each child. Once enrolled, your parent account will automatically be connected to your child's account.

Attached to this message, you will find a document with **step-by-step instructions** that walks you through the enrollment process and setting up your account. Additionally, there is a short **8 minute video** that provides an overview of the program and explains how Securly Home can support your family.

We hope this tool will help strengthen communication between families and students and support safe, responsible technology use at home. Thank you for your continued partnership with the Berlin Boylston Regional School District.

Timeline:

January 11 - January 24: Enrollment window open for families to complete [Enrollment Form](#)

January 26: Families will receive an Account Welcome Email from Securly (please remember to check your SPAM/JUNK folder)

If you have any questions or concerns please contact the office of technology at jsposato@bbrsd.org.

Kind regards,

Joseph Sposato
Director of Technology
