

Westside Math Vision Statement

In Westside math classrooms, teachers will...

- Create equitable, positive environments integrating scaffolded support
- Employ multiple engagement strategies, promoting collaboration and active participation
- Model precise mathematical language, advancing mathematical discourse
- Encourage multiple approaches to problem solving

So that students will...

- Work collaboratively and share strategies
- Represent mathematical reasoning in multiple ways
- Take risks and persevere in their mathematical thinking
- Engage in mathematical discourse to improve conceptual understanding
- Create clear and concise mathematical thoughts to explain their thinking
