

Canvas New User Interface 2016

Canvas has a new look! There are two changes noted below:

- 1) The Dashboard is the first thing you will see when you log into Canvas. The Dashboard helps you see what is happening in all your courses and allows you to see what to do next. Courses now look like blocks, and the side navigation is your Global Navigation. The Dashboard can be toggled to a course view or recent activity view and shows notifications for all Canvas courses. You can return to your User Dashboard at any time by clicking the Dashboard link in Global Navigation. Global Navigation links provide quick access to frequently used Canvas features. These links give access to all your courses collectively. Default links include the Dashboard, Courses, Groups, Calendar, Inbox, User Account, and the Help menu.

- 2) From the Global Navigation, one can click on the Courses link and see a cascade of available courses.
