

Paint, Ink, & Grease Remover

P.I.G.

Paint, ink, and grease remover. P.I.G. can be rinsed off with water. Also takes care of tar, gum, and cosmetics.

Contents: One U.S. Gallon (3.79 Litres)

BRIDGEPOINT
SYSTEMS

- X Residential Carpet
- X Commercial Carpet
- X Upholstery
- X Rugs
- N/A RTU pH

X = Primary Use ✓ = Secondary Use

- Versatile— P.I.G. is both water soluble and solvent soluble. Most often stains can be removed by adding P.I.G., water and extracting. Where solvents are more appropriate, P.I.G. can be flushed with volatile solvent.
- Effective— Ink stains that were previously thought to be permanent can now be easily removed with P.I.G. Used in combination with Avenge as the rinsing agent, P.I.G. has removed heavy deposits of ink on upholstery where other products failed.
- Free-Rinsing— P.I.G. will rinse free from the fabric with either water or volatile solvent. This means no resoiling problems.

DIRECTIONS

Test fabric for compatibility. Apply a small amount of P.I.G. to a towel and blot the stain. Repeat this process until the greatest majority of colored pigment is removed from the fabric. Apply P.I.G. directly to the stain and lightly agitate. Where appropriate, add a small amount of water or Avenge Stain Remover, agitate and extract with water. Repeat this process until stain is removed. If fabric is not water compatible, use a volatile solvent spotter to flush P.I.G. and the stain from the fabric.

Note: When using multi-purpose solvents such as P.I.G., always consider the possible negative effects on backing materials such as latex, foam cushion, and other stabilizing material.

INSTRUCCIONES

Compruebe la compatibilidad del producto. Con una toalla, aplique una cantidad pequeña de P.I.G. a la mancha, sin frotarla. Repita este proceso hasta que la mayor parte del pigmento haya sido quitado de la tela. Aplique P.I.G. directamente a la mancha y fricciónelo ligeramente. Si es apropiado, añada una pequeña cantidad de agua o de Avenge (quitamanchas) y luego friccione y extráigalo con agua. Repita este proceso hasta que se quite la mancha. Si la tela no es compatible con agua, utilice un quitamanchas con solvente volátil para eliminar el P.I.G. y la mancha de la tela.

Nota: Al usar solventes de múltiples usos como P.I.G., siempre debe tener en cuenta los posible efectos negativos que pueden producirse en los materiales de refuerzo o forro, tales como el látex, los cojines de esponja y otros materiales.

NOTICE TO PURCHASER: Seller's and manufacturer's liability for any and all losses or damages resulting from any cause whatsoever shall in no event exceed the purchase price of this product, with respect to which losses or damages are claimed. Before using, the user shall determine the suitability of this product for its intended use, and user assumes all risk and liability whatsoever in connection therewith.
