

How To Install Zscaler SSL Trusted Root Certificates

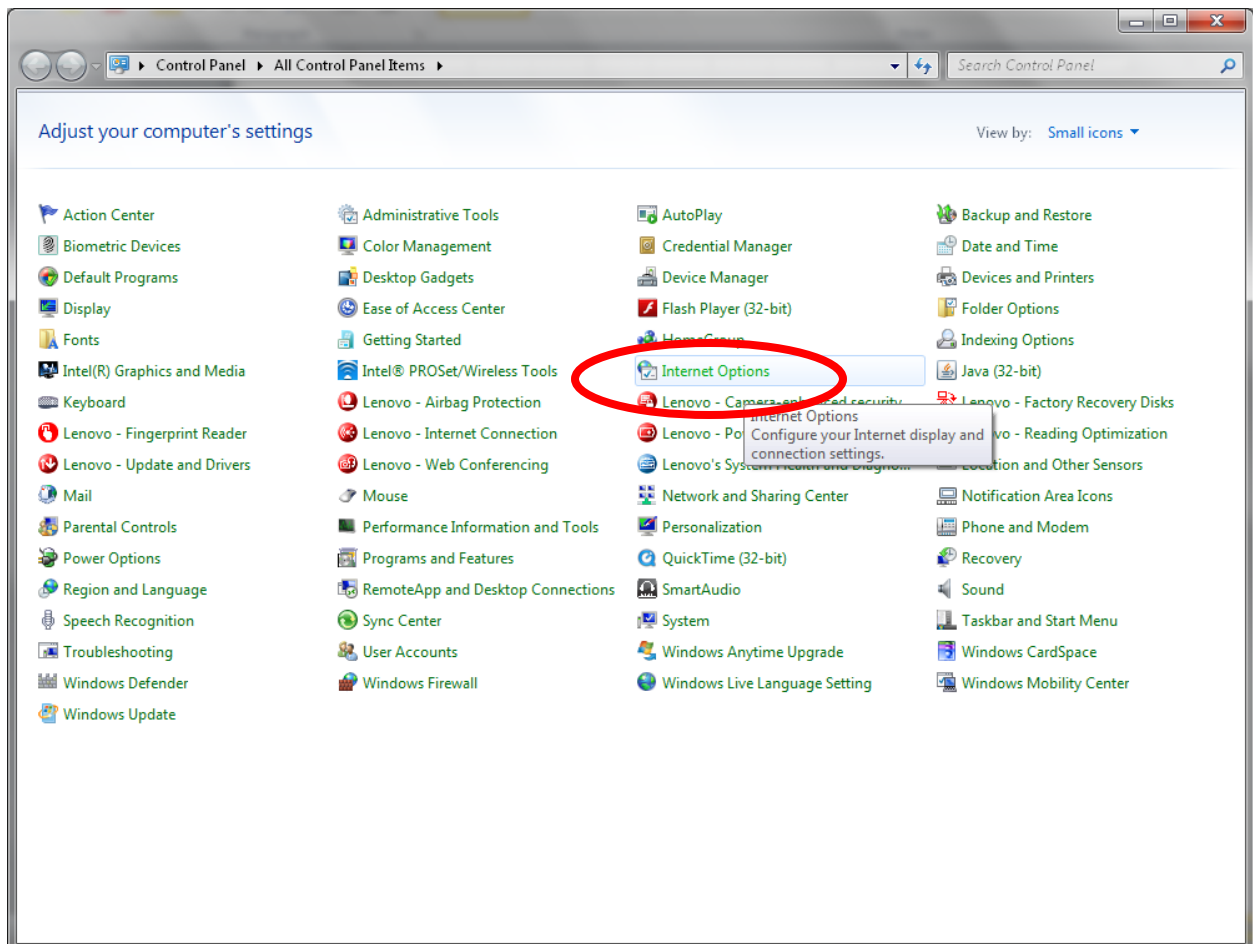

Browsers covered: Internet Explorer/Chrome.

These steps will not affect or fix Firefox. Steps for on Macs and iPads are similar to those listed here.

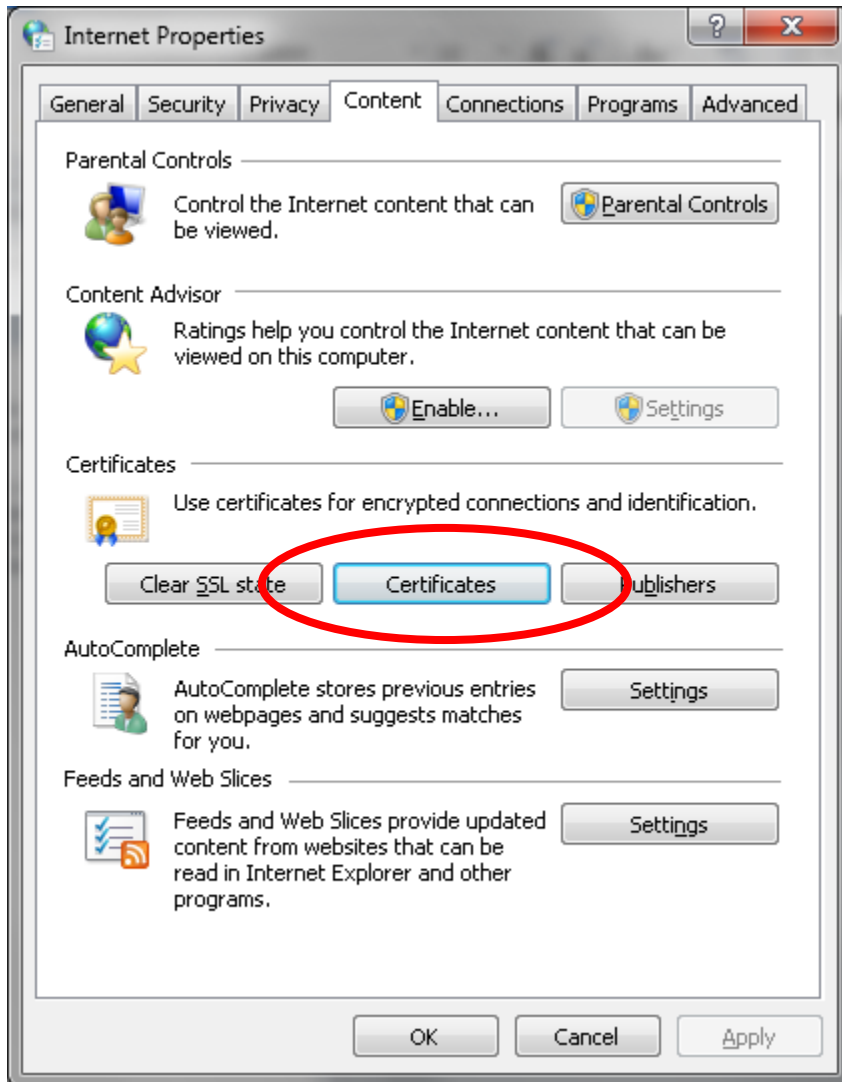

1. Locate the two Zscaler certs: "Current" and "New"

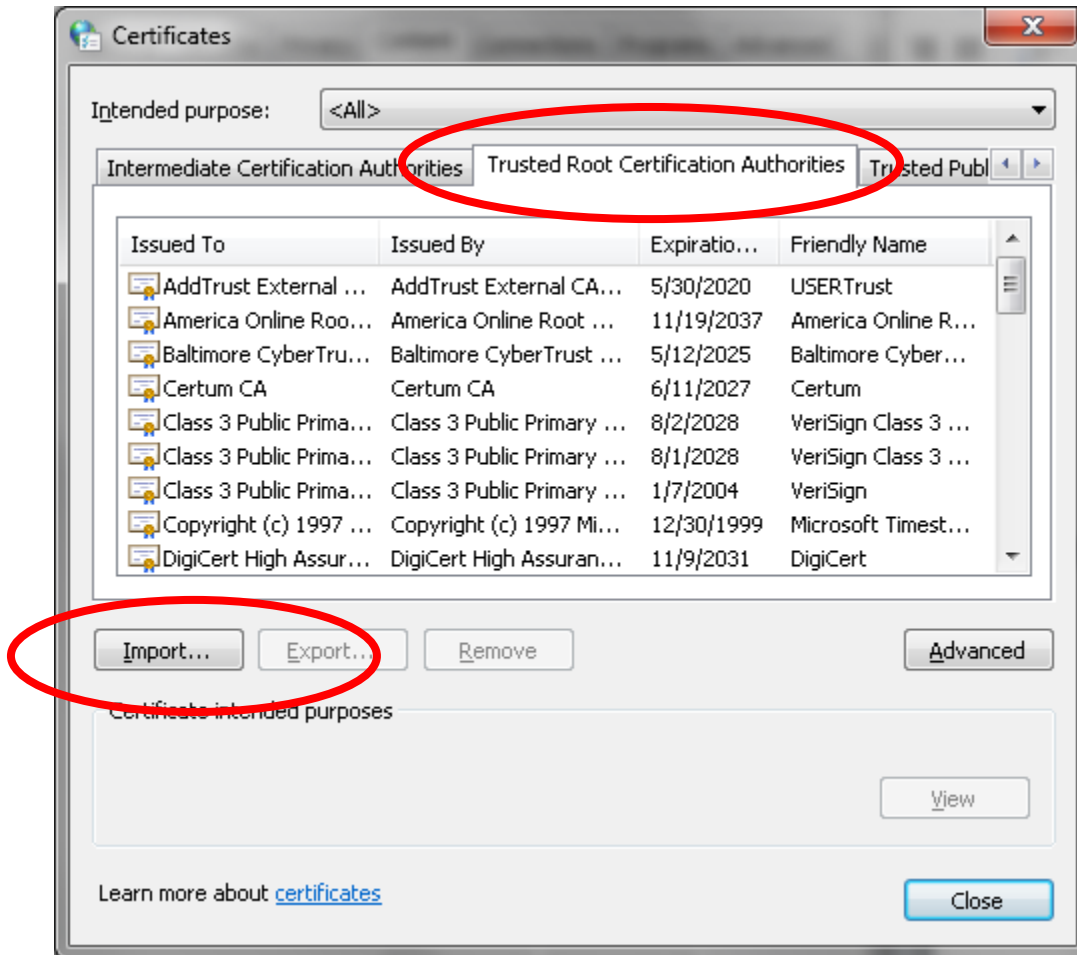

2. Open Control Panel and then Internet Options

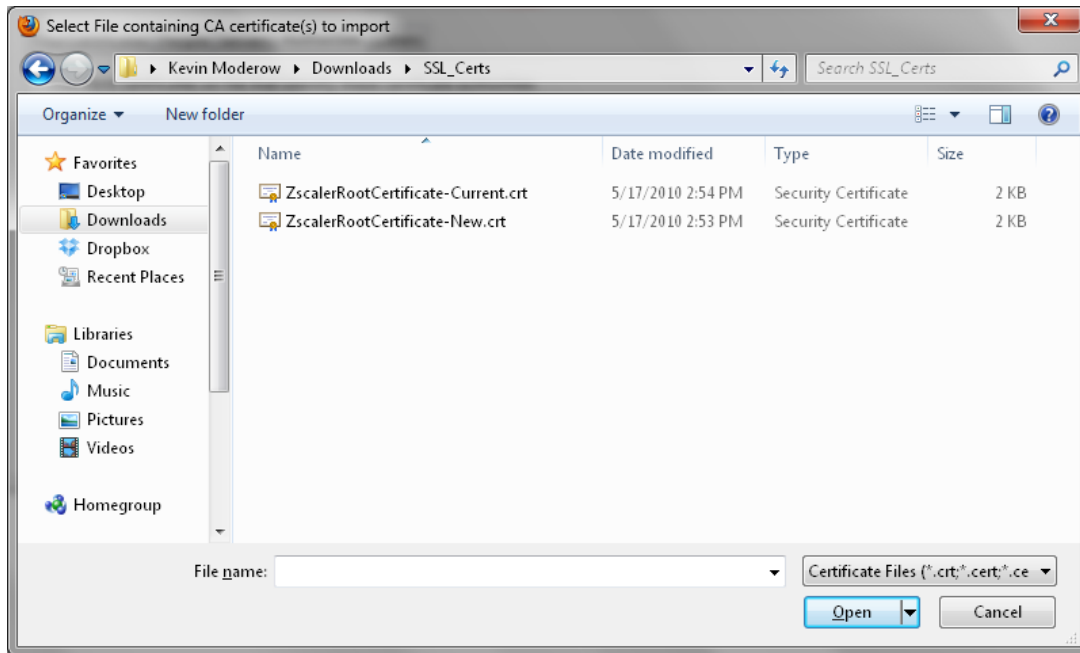

3. Open Content Tab and click Certificates

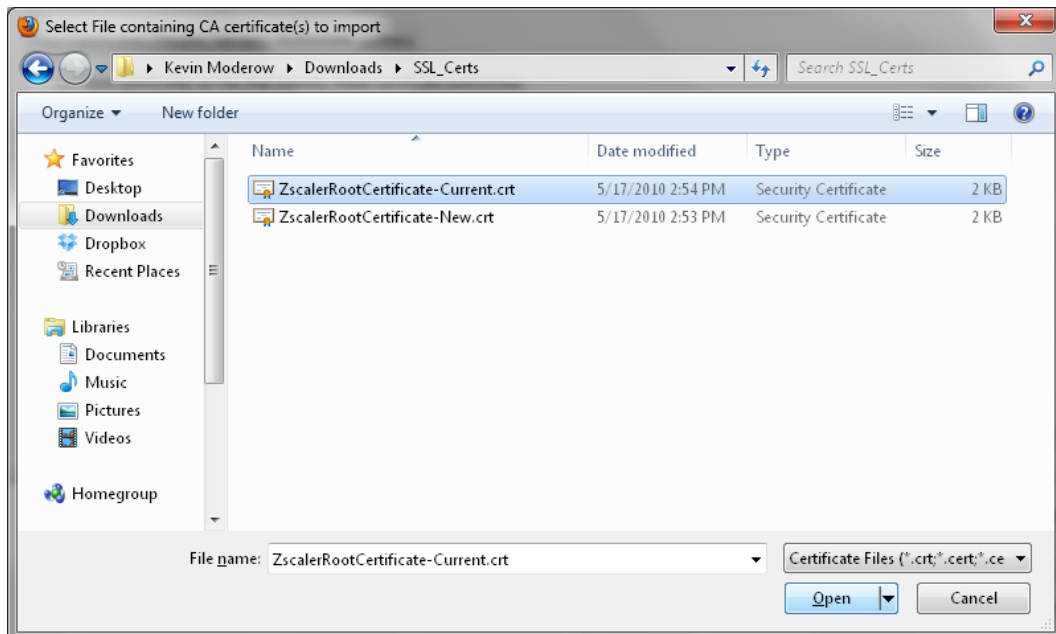

4. Click "Trusted Root...." And then Click Import

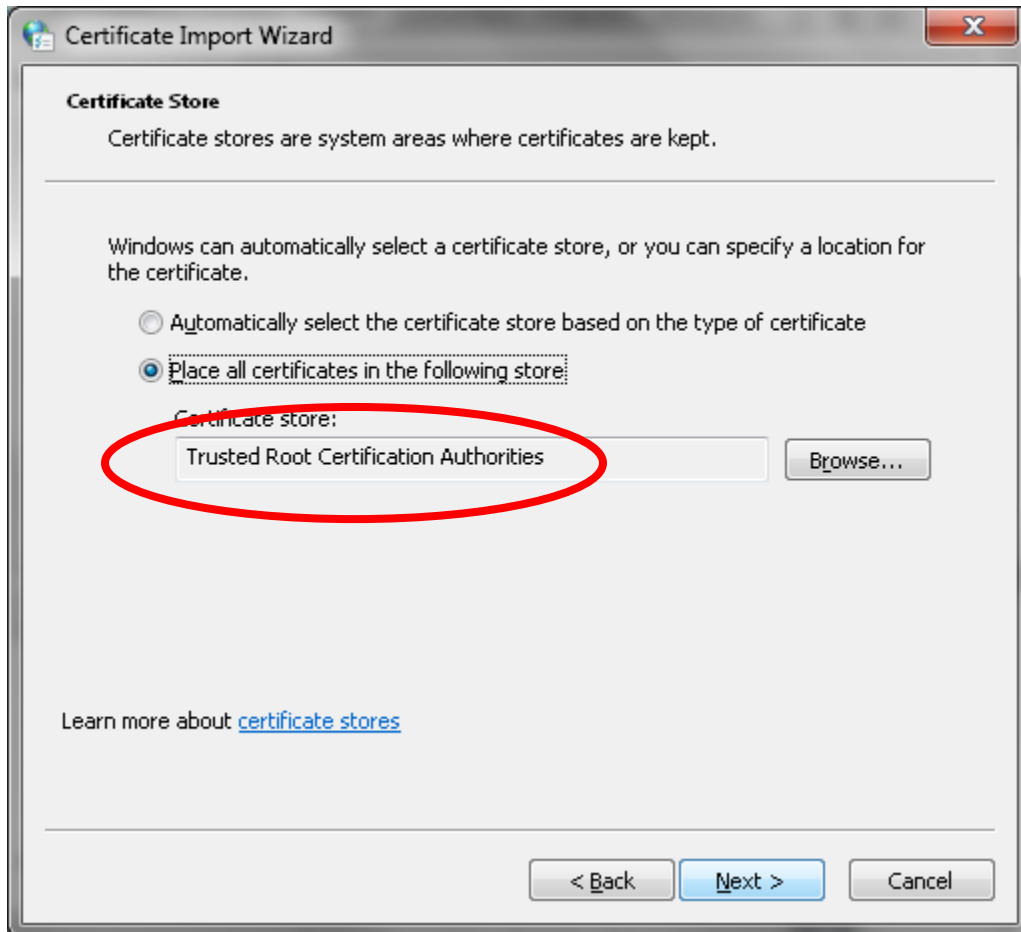

5. Navigate to the two certificates

6. Choose the "Current" certificate and click Open

6. Verify that the cert is being placed in Trusted Root Certification Authorities

7. Click Next and finish the Wizard

8. Repeat these steps for the "New" Zscaler cert as well.

9. Close all dialogue boxes
