How to make a Prezi presentation
There are also tutorial videos at https://prezi.com/support/

Open your browser and go to http://prezi.com/

Click on the link in the top right hand corner Log In or Get Started, if you don't already have an account.

If you are signing up, Click on the Continue button for the free Public version.

Fill out your first name, your last name, and your NSD Apps email address (example 999999@apps.nsd.org).

Choose a password (you can use your school password here too) and then retype it in the next box.

Answer a couple basic questions and then Click on Create your free Public Account

This will take you to a screen that allows you to create a new Prezi, so click on New Prezi

Search for the News Headline template and click “Use Template”
Each of the sections of the template can be edited or deleted. You can also add more components to your newspaper/magazine. Double click on a section to edit it. Use the “insert” button to add elements to your prezi. Use the “Customize” button to change your colors/theme. Notice on the left, you’ll see what look like slides in a powerpoint. You can edit in each “slide” if you like and can also reorder your presentation by dragging them to reorder.

For Using Prezi without a Template:

Zoom in to develop your ideas

Once you have added your ideas to the canvas as text, you can zoom in to these ideas to develop them and add more text. You can use the zoom buttons on the right side of the screen or scroll your mouse wheel to zoom in and out.

Use the zebra for structure and size

Now, you can arrange your ideas and create hierarchy through size. When you click on one of the text boxes, you’ll see the striped transformation zebra, which lets you move (center of the zebra), size and scale (inner ring of the zebra), and rotate objects of any kind (outer ring of the zebra).
Add images from the Insert menu

When you're ready to add images, you can simply click Insert on the menu in the upper left, and click on the image you want to use. Once the image appears on the canvas, you can click on the image and use the zebra to move, size, or rotate it. Quick tip: before you get started, collect images you plan to use in your prezi and place them in a folder for easy access.

Create your storyline

After you've added and arranged your text and images, it's time to add the storyline or path. Use the zoom buttons or mouse wheel to zoom out, as seeing the "big picture" can help you determine the right path for the ideas in your prezi. Click on Path, and add your storyline by clicking on the parts in the order in which you want to show them. If you want to change the order of your path, you can Delete All and start again or drag the unassigned path ball (that appears between path numbers) to the object you want to show.

Click 'Show' to present!

Ready to present? To move into presentation mode, click on Show and step through your prezi with the arrow buttons or arrow keys. In Show, you can click to zoom in and out of your ideas at any point and press the arrows to get back to the path. Publish from Prezi.com with a click After you present, you can publish your prezi by clicking on it from prezi.com/my and checking the box marked Publish. On the Share tab, you can invite others to view or edit your prezi, and obtain an embed code to easily add the prezi to your blog.
