1. PURPOSE AND PHILOSOPHY

Personal education planning is essential at the elementary and secondary level. This planning process is a cooperative effort involving students, parents/guardians, and educators. This partnership focuses on the individual needs of each student. At the elementary level (K-6), this planning takes place in the form of an individual learning plan (ILP). At the secondary level (7-12), this planning takes place in the form of a plan for college and career readiness. Consideration of reliable, useful, and timely data on student achievement and goals facilitates planning for pre- and post-graduation, and encourages a student to accept responsibility for his/her own success. Together, the individual learning plan and Plan for College and Career Readiness is a process which continues from grade to grade and school to school. Continual assessment of student progress and goals is the key to the individual learning plan and plan for college and career readiness process.
