

# Setting up VPN Connection for MAC users

Step 1

Open the Internet browser. In the address line, enter <https://216.186.51.175> -- Press Enter.

Step 2

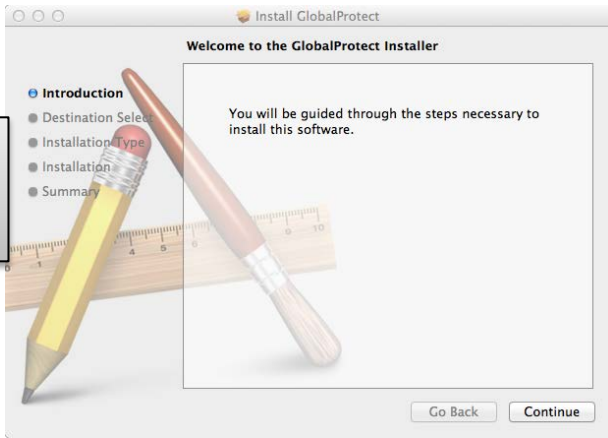

You will get this pop-up screen. Click **Continue**

Once you have selected Download Mac....a package will be downloaded. Open once downloaded and continue with Step 5.

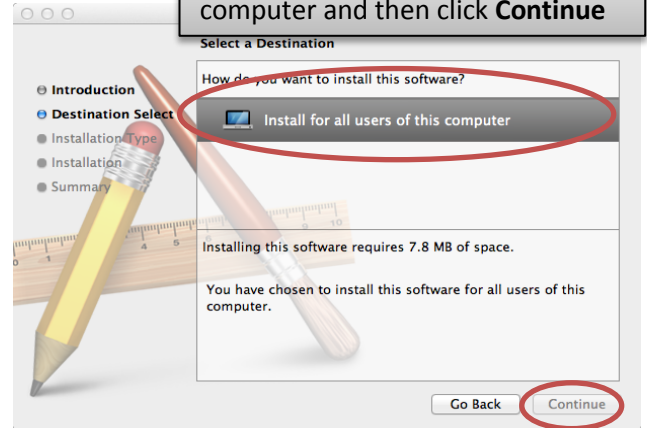

Step 5

At the Welcome screen, select **Continue**

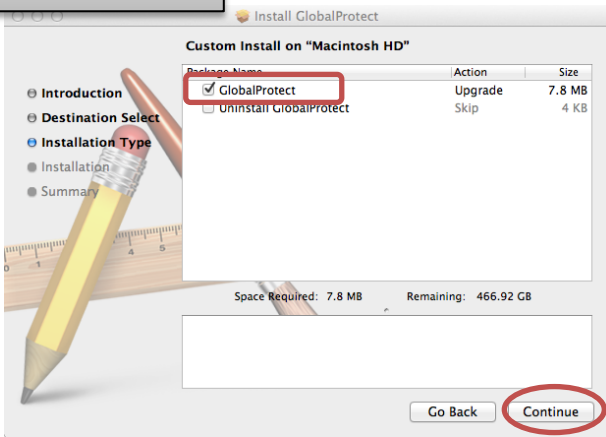

Step 6

Select **Install for all users of this computer** and then click **Continue**

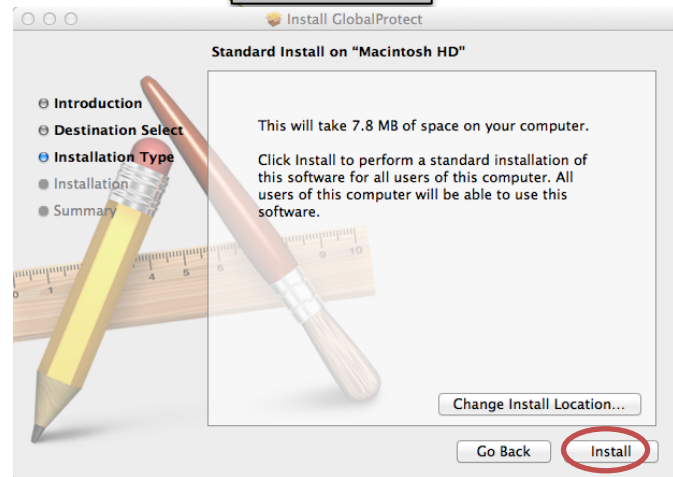

Step 7

Click to check **GlobalProtect** and then **Continue**

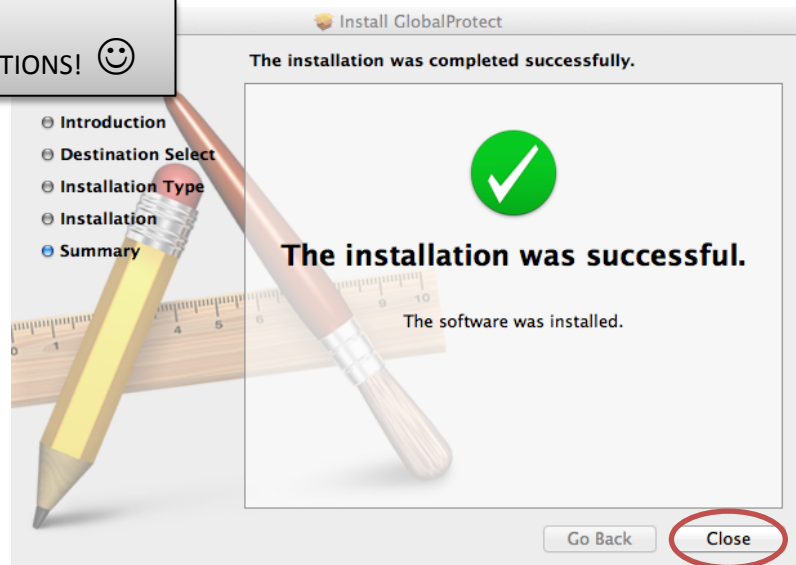

Step 8

Select **Install**

CONGRATULATIONS! 😊

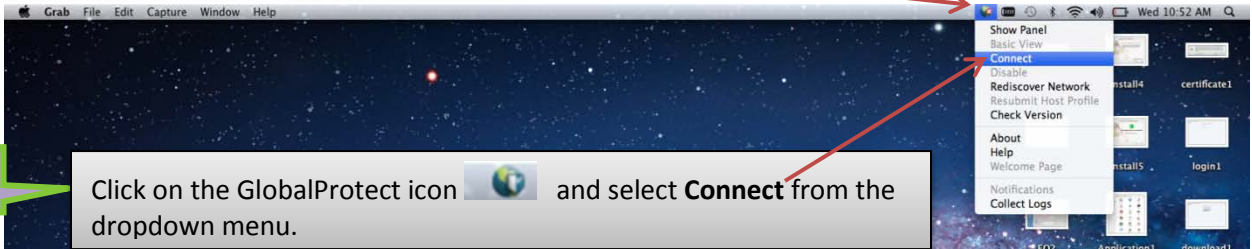

Once GlobalProtect has been installed, the top of your screen should show this icon 

Step 9

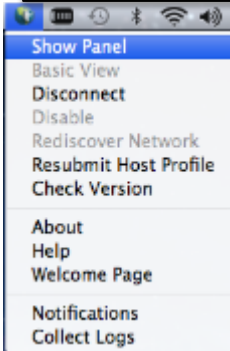

Click on the GlobalProtect icon  and select **Connect** from the dropdown menu.

**NOTE:** The globe will spin and the red X will disappear and be replaced with a shield.

Step 10

Click on the GlobalProtect icon  again and this time select **Show Panel** from the dropdown menu.

Step 11

Enter your normal district username and password.  
The portal is **216.186.51.175**  
Then press Apply.
