

Meningitis Vaccine

A Note from the Clinic for Parents of Seniors:

Your child will need to have current meningitis vaccine for the college entrance in the fall of 2017. Colleges require the vaccine to be given within the 5 years prior to the starting college. Please check your child's shot records or with your medical care provider and make sure that your son or daughter has had at least 1 meningitis vaccine dated 2013 or later. If their last vaccine was before 2013, you will want to get this vaccine ASAP. The meningitis vaccine is also known as Menactra, Menvov, or MCV4.

Please provide documentation to the clinic ASAP so that our records will be up to date.
