

AIM Academy CORE Math Summer Work

CORE Math Students:

Use the following resources, games, and practice websites to keep practicing your math fluency skills over the summer. AIM suggests committing 30 minutes each day to practice. Set a timer and don't break your streak!

Seek to master the following mathematical operations:

- **Addition** (including positive and negative numbers)
- **Subtraction** (including positive and negative numbers)
- **Multiplication** (including positive and negative numbers)
- **Division** (including positive and negative numbers)
- **Adding and subtracting fractions**
- **Converting fractions**
- **Estimation**

Games:
