

Community Council

TONIGHT

April 28th, 2017

Agenda

Welcome

2016/2017 School Improvement (SIP) Final Review of Goals

Reviewed and agreed to by all attending members. Mr. and Ms. Monson, Mr. Muegge, Ms. Miller. Mr. Kinghorn did not need to vote.

Blended Learning at Wasatch

SAMR and 4Cs Models.

Teachers have to be the best of the best to help students learn as Wasatch is, and help them on a more individualized level. We have this here, so the next steps are just using the programs that we have in a better, more data informed, in the moment reteaching capacity.

We will still have school-wide ratios of under 24:1. We WILL NOT have grades levels with one or to teachers teaching eighty students.

Comment was made by Mr. Monson that we need to adjust what we do, otherwise what we are doing will no longer be around. He likened this to the business world that he has been on for year.

Clearfield Partnership for a Playground

This will be installed in the summer or fall of 2017

Other

Talked about attendance and allowing students to discuss what they felt would help. These are things that were implemented into the plan.

Ensuring that students who come earlier than they are supposed to have a place to be, and are not just having to wait outside. – Students should not be at school before 8:30, as we do not have supervision for them before this time. If they get dropped off earlier, they are welcome to come into the school and read or do homework quietly. This is as long as they are not goofing off.
