

These are the extension numbers assigned to each location and will ring the main office phones when dialed. All other extensions within a school will have the same first two digits. These extensions can be found by searching the Corporate Directory on your phone.

You access it by clicking the button that looks like a Book in the upper left corner of your keypad. Then click Open and then enter either the persons First Name, Last Name, or the first two digits of their buildings extension number.

If you are unsure about the spelling of their name you can enter just a few letters and the directory will display everyone with that combination of letters.
