Board Policy 5470
STUDENTS

WELLNESS

The Board supports a healthy school environment by promoting education awareness, healthy options and opportunities, and encouraging and modeling nutritious eating habits and physical activity for all students, staff, and parents. Educators, administrators, parents, health practitioners and community members must all acknowledge the central role student health plays in academic stamina and performance, and adapt the school environment to ensure students' basic nourishment and activity needs are met.

The District is committed to providing students with a school environment that supports healthy eating and regular physical activity which are important for their ability to learn. Specifically, the District shall:

1. Foster in District students an understanding of healthy foods and the acquisition of skills that promote lifelong healthy eating habits and healthy nutrition practices.
2. Foster in District students an understanding of the importance of regular physical activity and provide opportunities for physical activity on a regular basis.
3. Provide a comprehensive learning environment that promotes messages and activities that are consistent with developing and practicing lifelong wellness behaviors.
4. Provide information on healthy nutrition practices and regular physical activity to parents and the community to encourage community support for healthy eating habits and regular physical activity.

The District Administrator shall establish a committee to annually evaluate the District's wellness policy. In addition, each school will have a person who will be responsible to ensure the school is implementing the District's wellness policy and administrative regulation. They will provide annual feedback to the committee on the progress of this implementation. The committee will report this data to the school board and community.
