

Wireless Guest Network

The district wireless network is an extension of the district network and may be accessed by using the Guest user ID and password, which is generated daily by the District Service Center Information Systems. This password will be emailed to each building administrator, or designee, and it is the building administration that will control giving out the password.

By using the district wireless network the user agrees to the following:

- This wireless network will only have access to the Internet and not allow connection to any district or school server(s), printer, or other peripheral device.
- All Internet usage will be filtered and logged according to Network Filtering.
- No technical support will be provided to make a device work on the guest network.
- Personal devices connected to the wireless network may be monitored and reviewed at anytime by designated technology staff.
- Personal web accounts visited while connected to the wireless network maybe monitored and reviewed at any time by designated technology staff
