

Carlos Trujillo

Major: Political Science,
Educational Counseling
Colleges: San Jose State,
University of La Verne

I went to college because:

I knew that I wanted to pursue higher education to open opportunities. I was a first generation college student.

My favorite experience: Getting involved and partaking in social/academic events such as ASB, Fraternity, New Student Orientation and endless tailgates and road trips with college friends.

The hardest thing about college: Persevering and getting through difficult classes which weren't part of my major. Further, just taking risk of going to college and not knowing anyone.

Advice: You must, must be mentally prepared and stick with the goal of graduation! College goes by fast, balance out academics and social life. You can do it!!!
