

What Google apps are allowed for students?

Students can access and install nearly any app that is available in the Google Web store. The exceptions are that we try to block all known proxy apps that allow students to bypass our web filters and any inappropriate games that are reported by teachers.

With those few exceptions your students can access and install any of the apps located in the Chrome Web store

<https://chrome.google.com/webstore/category/extensions>

While using a Chromebook or Chromebox students will find a direct link to the Chrome Web store in their start menu. After logging into a Chromebook

Students can access this by:

First clicking the App Launcher circle in the lower left corner of their screen, they can then scroll up and down through the list of apps that are already installed until they locate the one that looks like this →

Need an app for your Class or your entire School?

We can also pre-install web apps that you plan to use with an entire class or school wide. If you know ahead of time a specific app you want all your students to have access to just send the link or name of the app to our Helpdesk and we can add it to all your schools Chrome devices.

Warning! Too many Apps will Slow down your Chromebook.

While chrome apps are small and quick to install they can start to slow down your Chromebook experience once there are 20 or more of them installed and trying to connect to the internet at the same time. It is best if you let us know when you are finished with a chrome app so we can remove it. It would also help if you instruct your students to remove chrome apps that they are no longer using.
