Summer Math Packet 4th Grade

Funding provided by
Gull Lake Community Schools Foundation

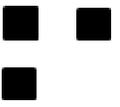

Dear Student,

It's a sad fact that almost everyone forgets how to do some math over the summer. Because we want you to be as ready as possible for 5th grade next year, we have made these practice sheets for you. All you have to do is a few problems each day for eight weeks. Print the sheets off and bring them back completed in the fall and you will get two things: a little token (also known as a **prize**) and a little jump start to the fall. (Won't it feel good to remember how to do things that other kids in your class have forgotten?)

We have also written a letter to your parents (p. 19) and have included some activities you can do online to improve your skills (p. 20). As John Adams (a famous American) said, "Practice makes perfect." But the main thing you need to remember is that **math is fun!**

Solve by making place value drawings.

a.

$$\begin{array}{r} 300 \\ -179 \\ \hline \end{array}$$

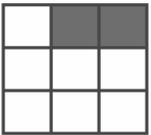

b.

$$\begin{array}{r} 642 \\ -195 \\ \hline \end{array}$$

Practice your multiplication facts for 15 minutes.

Match each picture to the fraction it shows:

$\frac{2}{4}$

$\frac{5}{6}$

$\frac{2}{9}$

$\frac{4}{5}$

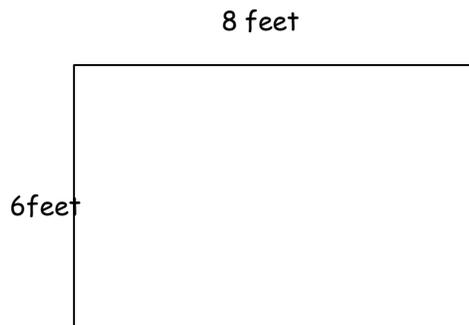

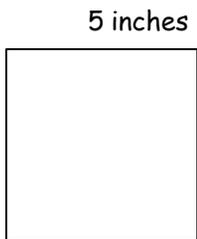

$\frac{1}{8}$

$\frac{5}{6}$

Find the area and perimeter of the following figures. (Don't forget to list the units!)

Larry, Lauri, Lila, and Lee were planning where to go on vacation: Lake Michigan, the mountains, Chicago, or to the grandparents' farm. Lauri loves to go to museums and go shopping. Larry hates to swim and Lila loves feeding animals. Which vacation will each person pick? (Finish the table to help you.)

	Lake Michigan	Mountains	Chicago	Farm
Larry			No	
Lauri	No	No	Yes	No
Lila			No	
Lee			No	

1/8 of the way done! Way to go!

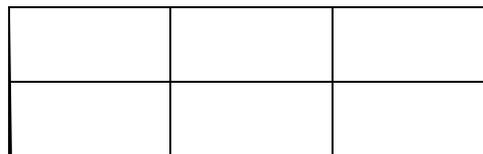

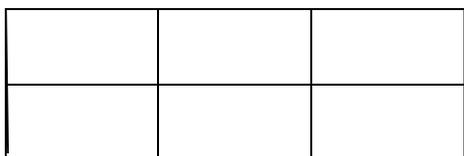

Multiply, using rectangular model.

At a new dog park near Lisa, there were more dogs each week. In the first week, there were 20 dogs. The second week, there were 27, and the third week 31. There were 38 dogs in the fourth week and 42 in the fifth. If this pattern continues, in what week will there be 80 or more dogs?

Week	1	2	3	4	5								
# of dogs	20	27	31	38	42								

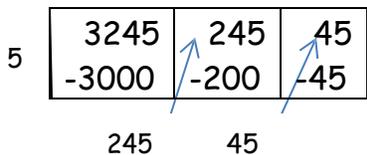

Great job! You have finished $\frac{1}{4}$ of the packet.

Divide, using rectangle sections.

Example: $5 \overline{)3245}$

$\times 600 + 40 + 9 = 649$

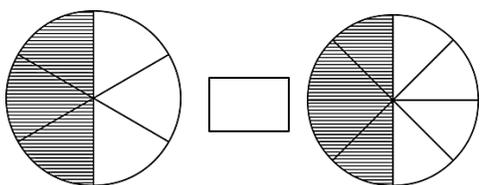

$4 \overline{)2378}$

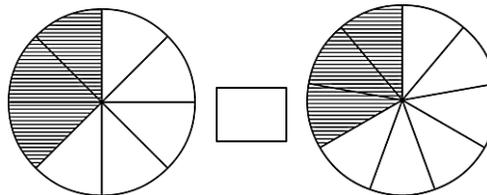

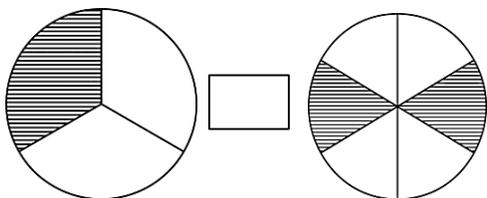

Practice your multiplication facts for 15 minutes.

Name, then compare the fractions using $< = >$

List all the **factors** of 36: 1, 36, _____, _____, _____, _____, _____, _____

List the first ten **multiples** of 6: 6, 12, _____, _____, _____, _____, _____, _____, _____, _____

Jason counted fireflies all summer. By the time school started, this number was:

- Greater than 195.
- Less than 300
- A number that is reached if he counted by 10.
- A number that can be evenly divided by 3 and 9.

How many fireflies did Jason count?

3/8 of the way done! Can you figure out how much is left?

a. $4 \times 4 =$

e. $25 \div 5 =$

b. $4 \times 40 =$

f. $250 \div 5 =$

c. $4 \times 400 =$

g. $2500 \div 5 =$

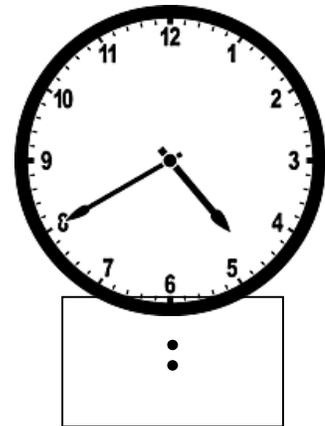

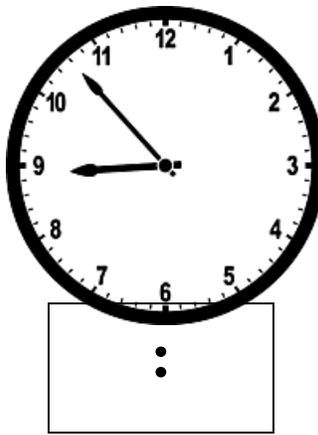

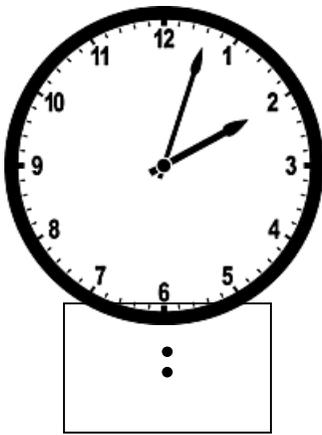

d. $4 \times 4000 =$

h. $25000 \div 5 =$

Great work! You're done! Don't forget to bring this book to school to claim your prize!

Dear Parents/Guardians,

We have prepared these math sheets to help your child maintain math skills over the summer months. We hope you will offer support in seeing that these few problems are done each day. Knowing that summers are busy, we have tried to make the activities as fun and meaningful as possible.

In developing this packet, we looked at the National Common Core Standards of Math, which emphasize problem-solving. We also asked our middle school and high school colleagues the most important skills for our students to master. Their number one answer was to make sure that all students knew their multiplication facts. The second thing they said was to make sure that students had a basic understanding of fractions. Research also tells us that students who have a mental picture of a number line are more successful than those who don't. The packet's focus on number lines and fractions are intended to deal with the latter two skills. For learning multiplication facts, drill and practice is the best. We have included some multiplication fact drills, but with computer access, there are some games on the web resource page that are much more fun.

Finally, even some fifth grade students still need to learn to tell time (on an analogue clock

), measure lengths, and count money. *Fortunately, these life skills can be practiced with you every day!* (These skills are generally not formally taught in math class after 3rd grade.)

We at Ryan look forward working with you as partners in helping your child maintain the math skills he or she will need in the fall. As an added incentive, we will give a small prize to anyone who brings a completed print the weekly problem pages back in the fall.

Have a wonderful summer and have fun with math!
