

Members present: Heather Marshall, Jimmy Jones, Natalie Argyle, Kallie Read, Jenifer Bottoms, Loren Clark and Kaylene Spraker

Minutes from prior meeting were approved.

Discussion was held regarding project priority. Our top two choices are carpet for the entire school and new security design for the front office. Also discussed were heating and air conditioning upgrade and activity room.

Small projects we discussed were security cameras, painting the molding and top of the hallways, an outdoor classroom, library bookshelf wheels, partitions for urinals, water bottle filling stations and bi level drinking fountains, furniture upgrades.

Upstart a free online preschool that the state pays for. Register is going on now and if you are low income you have a greater chance of getting in. Shout out to families about it. Mr. Clark will call out to the families tomorrow.

We discussed using extra Trust Land funds to fund more scholarships for those programs. We decided to fund at least \$700 to extended day kindergarten but if we get a STEM grant we will spend it on EXCEL programs and expanding other programs.

There will be lists of volunteer opportunities in the class room and for PTA and community council along with class lists in the fall.

The 5k for this year went great but we need to have more publicity. Professional posters to hang up in the halls, possibly have annual commitments from companies to be sponsors.

We looked over the School Plan for next year and discussed any changes that we might have. We talked about the SAGE tests and how that has been going. We're doing better on Literacy and Language arts.

We talked about Read Today tutors and a good goal for how many tutors would be 30. We also are working on an attendance goal with paying a TA to spend time tracking chronic absents. The faculty will be attending training in the end of June for staff development. We like our school plan and will not change anything.

Thanks for a great year. See you in the Fall.
