

## AP HUMAN GEOGRAPHY FLASH CARD LIST

The summer work expectation is to minimally complete the flash cards for the first unit, Geography its Nature and Perspectives. It is strongly recommended that students consider completing as many other unit flash cards as possible prior to the start of the school year. Students should use their text (for summer use digital version online) AND other reputable online resources. ALWAYS look for a geography perspective based definition and examples.

Flash cards for current unit of study should be brought to class every day. Flash cards must be handwritten AND completed on note cards. A due date will be given, however spot checks will be made regularly i.e. "Flash Card Friday" but may also occur in conjunction with reading/note taking (boldface terms in reading guide).

Must be  
handwritten on  
one note card.

IND & DEV

#36

Term, unit and number  
should be written on one  
side and the  
definition/explanation on  
the other side. Some  
students highlight  
term/unit with a different  
color for each unit.

- a "chaotic" set of processes and outcomes created by people
  - trade
  - new connections, better technologies around the world
  - sameness between nations, places

It is recommended that you complete your flash cards prior to or while reading assigned pages of the textbook. Students are strongly discouraged from completing a unit's flash cards at the end of the unit the night before they are due.
