Mirror Device Design: Peer Rubric	My name:		
Presented by:		Type of Device:	
What is the PURPOSE of this object?			
	best work	***making progress***	***needs improvement***
Engineering design process: improving the prototypes	The group **clearly explained** how they designed their first object, what **succeeded and failed**, and how they then **improved** their design for the second prototype.	The group made some important changes between P1 and P2, but did not clearly explain or analyze those changes.	The group made **a few minor changes** from Prototype #1 to Prototype #2, but they basically are the same. (Use the "comments" space below to suggest an idea of what they could have changed.)
How the object works:	It is easy to use the object for the purpose stated. **It "works" well.**	The object **sort of works** for the purpose stated, but there are some flaws (please write about them below).	The object **doesn't work**. It does not fulfill the purpose it tried to do. (Give a suggestion below.)
