

Mathematics: The Dalton Way

Our Beliefs

Everyone can successfully understand math at higher levels.

Numeracy rich communities are necessary.

Math is about connections, communicating and exploring.

Depth is more important than speed in math.

Math is about understanding, not performing.

In Math, learning from mistakes is valuable and takes perseverance.

Questions about why and how are really important in math.

Math is about engaging in creativity and making sense.

(Setting Up Positive Norms in Math Class, Boaler 2015)
